

Science

Last week many of you help Ms Bea plant seeds, which you have now taken home and are watering every day.

In your book, create a seed diary.

What seed did you plant?	What did the seed look like? (only draw this if you can remember, don't pull the seed out to look!)
Where have you put the plant pot?	What does it look like now?
Keep a tally of every time you water the plant. You could also measure how much you water it each time.	

If you were not in school last week and you do not have a seed you could grow at home, write and draw about all the plants and trees you can see from your windows.

I wonder if you can find out the names of any of the plants that you can see.
