Research

Borneo's Orangutans

Your task is to research the Orangutans of Borneo. You should be able to find a lot of information using the internet. Once you have gathered your information you should organise it into sections and write an information report on it. When writing the information report, you should remember the other texts that we have written in class. Make sure that your report includes sub-headings, factual information, dates and proper nouns and is written formally. You should also try to use the range of punctuation that we have learned this year. The report should be about 1-2 pages in length.

Creative Task

For this task you will need to use any scrap materials that you have at home. Your recycling bin may come in handy for this task. Items such as cereal boxes and other cardboard boxes could be used but you are allowed to use any materials that are available to you.

You need to create an orangutan.

I will not put too many restrictions on this task. Please be as creative as possible. The model can be 2D or 3D and can be made using whatever materials you like. It can be as large or as small as you like. On the next page, you will find some pictures of orangutans and some pictures of artworks to give you some inspiration.

Different materials and methods will pose different challenges. Try to push yourself and don't just take the easy option. Remember nothing worth doing is ever easy.
