## Art and Design

### Mythical Creature

Your task is to research a range of animals or use your previous experience to recall a range of animals- think of our Science topic on adaptations.

Once you have researched these animals, I want you to design the ultimate creature. Use different body parts and features of a range of animals and combine them to create one creature that is perfect. Your animal could be a carnivorous predator or could be a herbivore that is a master of camouflage.

Once you have selected all of the body parts for your creature, you are to sketch the animal on a piece of A4 paper. You can add colour if you would like.

Selecting each part of your creature needs to be done with thought as when you have finished you need to annotate each adaptation that you have included and state why you have included that body part- describe to the reader how it will help them to survive.

### Challenge

Once you have finished your design, use it as inspiration to create a text. Be imaginative with your text. You could create a narrative with your creature as the main character and could also create a fantasy world for it to live in. You could also use your annotations to create an information text for your creature pretending that it is real.

The choice is yours but remember when writing to include a range of punctuation and to include all of the skills you have been taught this year.

Here are some designs to give you some inspiration.
