

Maths 5 – puzzles

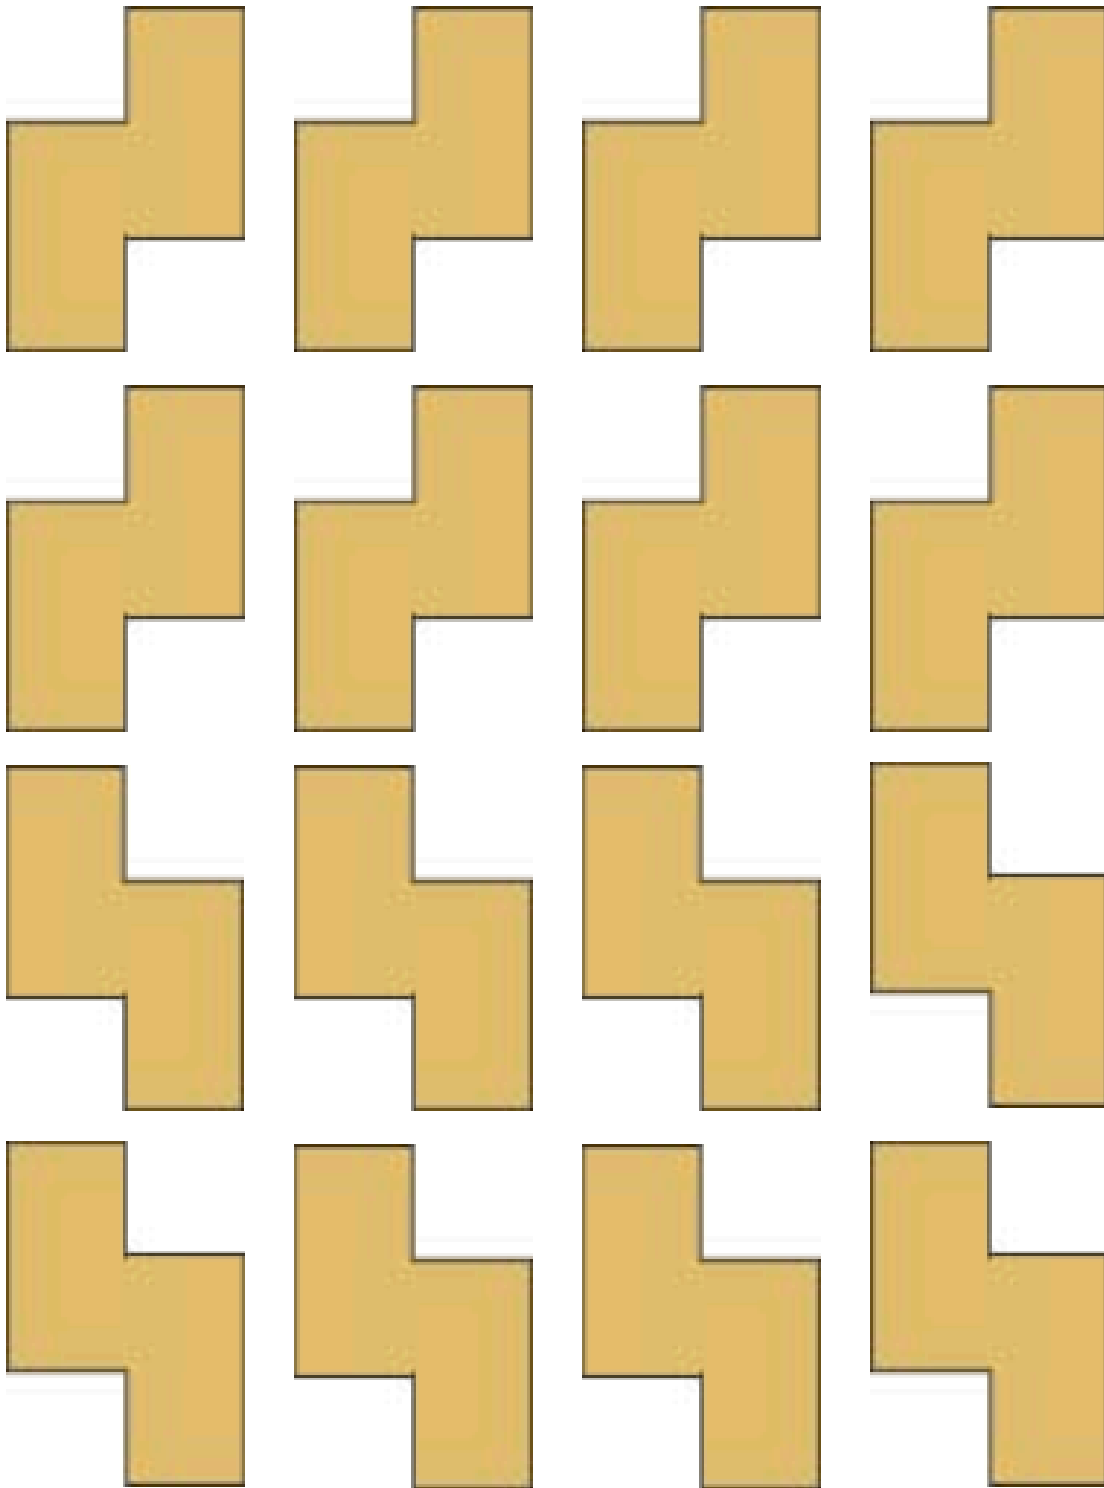

Can you cover every square of this camel using only pieces shaped like this

If you have a printer, you could print out the camel and the shapes (on the next page). If not, you could draw it or ask someone to help you drawing it, or you could use the computer to do it.

Tip from Ms Page –

When I tried this challenge, I used word and draw around the two shapes. I then copied and pasted them when I needed more. If you don't have word, have a look at the programmes you do have and see if any of them will work.

Challenge:

How many different ways can you cover the camel?

What other shapes could you use?
