

Health & Safety Policy

POLICY

This policy is provided for Care College customers, including learners and staff members who are using or delivering the courses and qualifications Care College offer.

The duties of Care College are to:-

- ensure that this Health & Safety Policy is implemented on a day-to-day basis and that sufficient resources are made available to achieve this
- maintain adequate records in relation to staff and learner health & safety (e.g. Induction)

Duties of all staff

The duties of all Care College staff are to:-

- Take reasonable care for the health and safety of themselves, visitors and others who may be affected by their acts and omissions while on Care College premises and the sites where learners are working
- Report promptly any accidents, incidents, unsafe conditions or practices and potential risks to their line manager
- Personally demonstrate good standards of health & safety practice
- Take particular care in all practical teaching areas
- Promote good practice through the quality of learning and understanding of health & safety

Duties of all learners and course delegates:

- Familiarise themselves with all health and safety information provided by Care College and their employer
- Follow and act upon any instructions that are given either verbally or in writing by a Care College member of staff in connection with health and safety.
- Bring to the attention of a member of Care College staff any difficulty in understanding health and safety information or instructions.
- Co-operate fully at all times with Care College to ensure that statutory obligations are met.
- Report immediately to a member of Care College staff any hazard, potential hazard, breakdowns in practice or procedures, unsafe conditions or defects to equipment which

may affect health and safety in the workplace or training centre.

- Report any accidents or incidents they are involved in.
- Ensure that where necessary/required the relevant PPE is used in the interests of health and safety.
- Advise their trainer/assessor of any personal difficulties associated with the use of any equipment provided.
- Provide Care College and their employer (where relevant) with any medical information which may affect personal health and safety or welfare.

Portable electrical equipment is in use by Care College. It is subjected to periodic inspection to ensure its continued safety in use. If any person identifies a worn cable, defective plug or any issue with electrical equipment which does not work correctly, it is their duty to report the hazard to their line manager, immediate supervisor or Centre Manager/Director/Owner.

Fire alarms will be tested weekly by a member of Care College staff. If a fire is discovered on _____premises:-

- Sound the alarm
- Leave the building by the nearest exit and do not delay by collecting your belongings.
- Go to the fire assembly point
- Ring the Fire Service (dial 9 and then 999 from a company phone)
- Do not re-enter the building until the 'all clear' is given
- Trained staff who feel competent may wish to tackle a fire using the equipment provided but do not attempt to fight any fire in isolation.

In the event of a person being injured and requiring first aid, a qualified first aider should be contacted. Smoking is only permitted in designated areas outside the premises.

Personal Protective Equipment (PPE) is issued for protection where it is not possible to remove all the risks from a process or operation by other means. PPE does not remove all the risks and caution must still be exercised when carrying out an activity.

In general, it is a requirement to:

- wear or use PPE when it is required by legislation or code of practice
- ensure that PPE is worn in accordance with any training or instruction that has been given
- take reasonable care of PPE to ensure it remains in good condition
- report any defects to your immediate supervisor as soon as they are noticed
- ensure that others who may be affected by activities are either isolated from contact or are issued with temporary PPE

Care College will undertake risk assessments to identify significant hazards that may arise in the workplace.

Trainers and assessors working on behalf of Care College are responsible for conducting risk assessments on curriculum activities to ensure safety of the learners.

Young people (under the age of 18) may be at greater risk due to factors such as a lack of maturity and experience. Therefore, it is particularly important to undertake a risk assessment on activities to be undertaken by a young person. In addition, a young person must not be asked to undertake activities beyond their physical or mental ability or where lack of experience and training would mean they are unlikely to recognise the risk.
