JIGAR K. PAREKH
Motivational Coach - Psychology of Success - Vastu Shastra

You do not need any kind of background or knowledge of human psychology to understand and start using these tips and tricks. It can also be used by any person who is going for the first job and want to get success, it can also be used by house wife while dealing with their husband to maintain and understand their healthy relationships, it can also be used by a expert sales man working in an organization while dealing with clients, it can also be used by friends to understand the level of trust among the group and many other.

Here is the Secret of Success described through Human Psychology. Human's are blessed with Brain as compared with other living beings on this planet. There are lot of studies related to human psychology published till date across the globe, but out of which there are few easy tips and tricks which one can remember and also adopt in their day to day life for getting success in their professional and personal life. Here are the few tips on human psychology described in brief for even a layman to understand and start its implementation.

IMPORTANCE OF PSYCHOLOGICAL BEHAVIOUR

It is very important to know that whatever we talk with words is contributing only 20% to others where 80% is communicated through our body language through subconscious mind. As every thought in our mind is directly related to our body and the body shows exactly similar gestures and postures what you are talking about with words which are flowing through your thoughts from your mind.
