

**B2CPrint** is the developer of today's most advanced online printing solutions, focusing on its unique purpose of developing server-free "Web to Print" systems. After many years in the market **B2CPrint** is proud to say that its motto "get your website to work for you" has proven itself. Hundreds of Print Service Providers worldwide have improved their workflow and enjoy online sales increase. **B2CPrint's** website can be up and running within a few weeks and provide you with multiple solutions for your end users.

## Online "Design and Order" tools

Enable the general public and small business customers to order all of their print & merchandise requirements through your website. Customers will select from your general catalogue of products, modify these online where necessary, proof and pay by credit card, providing you with a cash positive business.

## Business customers dedicated portals

Provide your corporate clients with dedicated portals where they can modify and order their Company's products. Editable products can be proofed easily online, to save proofing time and to increase accuracy. Enable 'Approval' functionality for the purchasing Manager – ideal for large corporate and public sector customers.

## Wide format product ordering

Online ordering system for wide format products includes Display products, Canvases, Posters and Stickers. Combined with Art Galleries and Facebook/Instagram integration.

## Online job pricing and submission

Enable customers on your website to select the materials, sizes, weights, printing type, and number of pages, and get a price quote for the job. Customers can then print the quote, email it, or upload their files and submit their order in a short and easy process that will save you, the print service provider the time of pricing complicated jobs and sending them back to the customers.

## Your "One Stop Shop" shopping cart

B2CPrint offers a SAAS, "One Stop Shop", and One Shopping Cart Solution without hardware requirements. 1000's of graphic templates built-in for a quick start, user friendly ordering system, and online management system that controls every aspect of your website and much more.
