

1.The toy robot was £14 in the shop. It was half price the next day. How much does it cost now?

2.Rob drinks 22 cups of water in one day. How much water would he drink in half a day?

3.Adam saw 28 different toys in the toy shop, but half of those had gone when he went back in the next day. How many toys were left?

4.Aliya has 26 dolls and she halves them with her best friend. How many dolls do they each have now?

5.Miss Gilbert shared 20 apples between her and Mrs Patel. How many apples did they each get?

Challenge! Look at this number chain. Can you work out which numbers were halved to make it? What is the pattern? Can you make your own number chain in your book?
