

What do you notice about this map?

What are its similarities and differences compared to a modern map?

What is this?

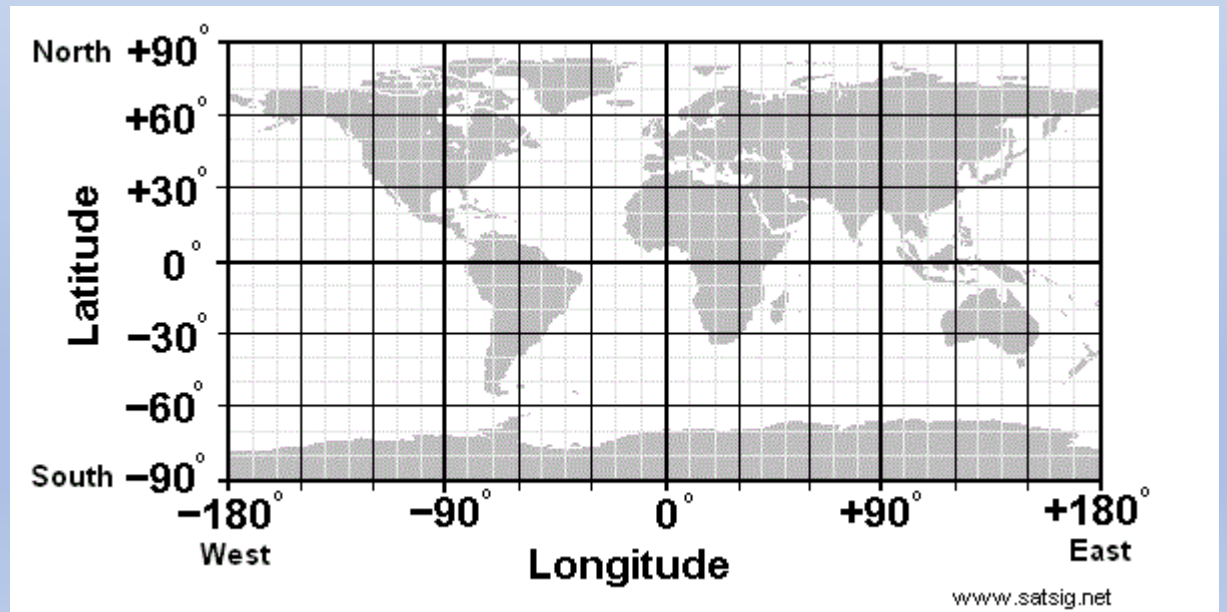

How would it have been useful for Christopher Columbus?

How would he have used it, and the lines of longitude and latitude, to help him navigate?

Latitude and Longitude

To recap, click the link below:

Task:

- On the map, plot Christopher Columbus' journey.
- Use your prior knowledge to mark the Equator, Northern and Southern Hemispheres, and the lines of Longitude and Latitude.
