Castles are large houses. They have very high walls and are made up of lots of materials. The three main materials are wood, stone and metal. Castles have very large tall towers. One of them is called The Keep. It is found at the centre of the castle. Castles have very large doors. Some castles have a deep moat going around them. Knights used to live in castles and wore armour, gloves and a helmet too. The most important people who lived in the castle were the Lord, the Lady and the Bishop. A famous person who lived in a Castle was Queen Victoria. She was married to Prince Albert. There are many Castles in England. Here are some of them: The Tower of London, Warwick Castle, Lincoln Castle, York Castle and Windsor Castle.
