- Leathergrain Matt Finish available in black and white.
- Leathergrain Plain available in white only.

Please contact us for product specific fire rating information.

Fire retardant, certificate available on request.

Leathergrain is a leather effect PVC that is suitable for decorating wall panels for exhibitions and display panels. Under foam should be used beneath the leathergrain to provide a padded look and the leathergrain can be glued or stapled to the wall panel.

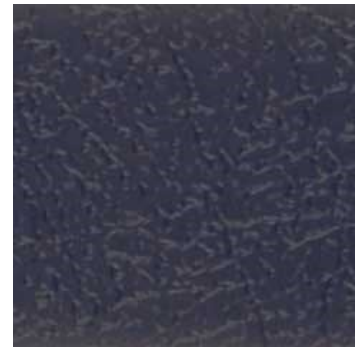

Please note: Whilst we have made every effort to ensure colour accuracy on this PDF, variances in monitors, graphics cards and the floor covering manufacturing process, mean actual colours may vary. The colours shown here should be used as a guide only.
