Accountability for nonprofits means many things: financial transparency, collaboration, stakeholder engagement, and most importantly, program execution. Today’s due diligence standards demand too much for staff to rely on spreadsheets and manual processes. **Amp Impact** provides the platform your organization needs to measure impact, drive stronger accountability, and deliver better programs.

Built on Salesforce, the world’s leading cloud-computing platform for nonprofits, Amp Impact helps organizations measure the outcomes, performance, and cost-effectiveness of projects and programs locally and globally. Organizations around the world use Amp Impact to inform program decisions and achieve stronger results for their beneficiaries.

---

**End-to-end Results Management**

Streamline indicator management and performance reporting. Calculate and aggregate standard and/or project-specific indicators across your portfolio with powerful automation, setup logframes for projects to improve outcomes, and monitor budgets and expenditures in real time to simplify financial transparency and accountability for stakeholders.

**Impact Analysis and Reporting**

Analyze targets and results for indicators across your portfolio of projects and programs using built-in performance graphs and drag-and-drop Salesforce report and dashboard tools.

Implementation Planning

Create implementation plans for projects and track the delivery of activities within the plan as they relate to objectives, indicators, budgets, and individual roles. Visualize activities in Gantt charts, displaying planned versus actual start and end dates.

Powerful Connectivity

Down with information silos! Easily integrate with your Salesforce CRM, the Nonprofit Success Pack (NPSP), and thousands of other apps on the Salesforce AppExchange.

Customer Success

“The Aga Khan Foundation has adopted Amp Impact to help us capture and aggregate data across 7 themes and 17 countries. Users have found it intuitive and the information it is yielding is feeding into our program design and planning processes. Amp has helped us to get quite granular data back into the hands of field staff to help inform their daily work and it's also streamlined considerably our global reporting processes.”

Global Lead - Results & Learning
Aga Khan Foundation

“Amp Impact is streamlined for every project and it has enough flexibility to adapt to every project situation. If you go to a program you can see which grants are funding it, which donors we will report to, and results for indicators that we track. This is the power of using all these components on the same platform — everything is integrated.”
