

## CORPORATE OVERVIEW

The Computime Group provides organisations with a full range of specialist ICT services employing highly dedicated professionals working in partnership with global market leaders.

Our aim is to translate cutting-edge technology into competitive advantage. We deliver optimal solutions in the fields of IP communications, e-security, network infrastructure, finance and business applications, business intelligence, integration and automation solutions, and custom software development.

Computime Software, a division of the Computime Group, is a leading provider of standard and customised business software and integration solutions for organisations across the globe. We deliver industry focused solutions to various sectors such as Energy & Engineering, Transportation, Banking & Finance, Hospitality, Professional Services, Telecom, Retail, and iGaming. Our customer base is immensely varied and ranges from local SMEs to large multinationals.

## GLOBAL PRESENCE

Computime is strategically positioned to support our international customer base via our offices in the UK, Malta, North Africa, and also supported by our worldwide business partners.

## SOFTWARE PORTFOLIO

Computime's software solution offering is based on a mix of world-class leading on-premises and cloud-based products, along with our proprietary technology. The internationally recognised products that we offer include IBM Maximo for Enterprise Asset Management, Infor SunSystems for Financial Management, and Acumatica for Enterprise Resource Planning. Our AXON product functions as an application integration and automation solution, while iRIX for procurement complements our financial management offering. More unique requirements, which are not easily addressed by our standard products, are fulfilled through custom software development.
