

Procedures and policies for maintaining and utilizing physical, academic and support facilities - laboratory, library, sports complex, computers, classrooms etc.

The Bhawanipur Education Society College offers our students world class facilities, something which will not be possible without a strong infrastructure, its maintenance policies, a set of highly motivated teachers and capable support staff. The infrastructure of our esteemed college includes a large number of spacious classrooms, Classrooms that are equipped with ICT facilities, the projector comes with an inbuilt speaker, each classroom is not only properly ventilated but also fully air conditioned. We have a total of six smart classrooms, the laboratories like computer science, chemistry, physics and journalism labs, a sports arena comprising table tennis, carom, snookers and pool boards, a basket ball cum badminton court, AV halls and a library.

The college had done a commendable job in providing the students and teachers with these amazing facilities, but what really makes the difference is the way in which these amenities are maintained by the college. Each laboratory is placed under the care of certain individuals who are called lab attendants. These lab attendants are responsible for their assigned laboratories. They ensure that all the laboratory stocks, equipment and instruments are properly maintained. If certain equipment or instruments start malfunctioning they are immediately replaced or repaired. The support staff comprises sweepers who are responsible to keep the classrooms and corridors clean at all times during the day. The air conditioners are serviced every year, which keeps them in top shape and working condition throughout. Each teacher is competent enough to work with ICT facilities. If any teacher finds that a projector in a room is not working, he or she immediately informs their respective Vice Principals, who then inform the System Control Room. The System Control Room is responsible for maintaining the ICT facilities all throughout the college.

The college provides a wide variety of academic support not only to its students but also their teachers. The college motivates its teachers to make learning experience. The college expects its teachers to go beyond the limitations of the syllabus and impart a wide variety of knowledge to its students. The teachers organise a lot of academic events throughout the year including workshops, seminars, etc. The college is more than happy to help its teachers organise such events. Getting permission is no big deal and the college provides adequate funding for such events to be organised in a successful way. The college also invites famous dignitaries from other colleges and different Universities to deliver an informative talk to the teachers and students. Such measures not only motivate the teachers to focus on their research but also manage to capture the interest of the students who are motivated to take up research later on in their lives. The college maintains a large library with a wide variety of books from different streams. Apart from these the library also provides access to Journals, Periodicals and Magazines, both online and in print.
