

# PHONE ETIQUETTE FOR KIDS

Make your kids safety a priority

## 1 GIVE GUIDANCE

Younger kids who are still learning how to navigate life should be given some help with social media and chat etiquette, hopefully, a little pep talk about the rights and wrongs of using social media and chat will help them make better decisions in the future.

## 2 MONITOR YOUR CHILD'S PHONE

Kids are using phones much younger these days, so it's imperative that you monitor your child's phone daily.

## 3 DON'T SEND PHOTOS

Teach your child not to share images of any kind to anyone if they wouldn't want them to be shared!

## 4 WATCH FOR STRANGERS

Talk to them about not chatting to, and not arranging to meet strangers over the phone. Make sure your kids can't be befriended by or contacted by anyone that they don't know.

## 5 STICK TO AGE LIMITS

Don't be tempted to ignore the minimum age for apps; they are there for a reason, to keep your child safe from predators and unsuitable content.

## 6 TEXT ETIQUETTE

Teach your child not to text anything to anyone that you wouldn't want your parents to read, explain that people screenshot everything these days, then show it to everyone, so be careful what you put out there.
