

## **Telecoms Engineer**

Location: Enfield, North London  
Job Type: Full Time - Permanent  
Salary: Up to £30K per annum (negotiable, depending on experience)  
Other: Must have clean driving licence - Car or Car Allowance

### ***Mixed Role: Installation, Commissioning, Diagnostics, Support & Service***

The Network Communications Group is a digital transformation business; we are a leading supplier of Cloud & Hosted Solutions, SIP & VOIP Telephony together with all types of Connectivity to industries and businesses throughout the UK and Europe.

Due to the predicted growth of the company, we are seeking to recruit a conscientious, hardworking and motivated engineer who wants to further develop their career within a dynamic and ambitious company that has been established for over 30 years in the telecoms industry.

Minimum of 5 years' experience is necessary for this telecoms role which also includes 1<sup>st</sup> line support & desk based duties. Ideally we require an experienced Ericsson LG engineer with excellent knowledge of the IPLDK series, as well as Cloud & Hosted Telephony and who has worked on systems in a data network environment. However, candidates with experience on Mitel or Avaya IPO will be considered for this demanding role.

### ***Key Attributes necessary for this role:***

- Excellent communication skills
- Diligent & thorough
- Excellent problem solving
- Flexible, positive attitude
- Self-motivated & disciplined
- Strong, reliable team player
- Customer focused
