

Journal of Caribbean Environmental Sciences and Renewable Energy

Call for Abstracts CESaRE's 1ST Academic Issue in 2021

The Journal of Caribbean Environmental Sciences and Renewable Energy is changing the landscape of Caribbean publishing. Our current Call for Papers is for an Open Issue promoting research across the region.

Modern publication is leaving the Caribbean behind. Today's climate extremes, energy demands and depleted oceans drive CESaRE to make research more open-access. Follow the link below to learn more about our Journal and the impact that your research will have.

Get to know CESaRE more: www.cesarejournal.org

Welcome research submissions include,

Alternative Energy
Industry and Transport
Climate Change and Modelling

Marine Ecosystems and Fisheries
Agriculture and Forestry
Conservation

Sustainable Policy

The Issue

Submit
Abstract

1. Submission Timeline

Abstract submissions for Issue 1 (Open Issue) are due Mar 12th, 2021. Earlier submissions are encouraged. Please use the hyperlinked button (left) to submit. All articles will undergo double blind peer-review.

3. Publication Timeline

The Open Issue will be published in June 2021. Your article (once approved) will be given a formal DOI listing and will be available through all major academic search engines as we grow.

2. Editing made easy

You have enough research commitments and CESaRE will make it much easier to publish. Using clear formatting guidelines, you can take control of your paper. We will do the rest. Successful authors will be asked to make a minimum contribution.

4. Pushing Boundaries

Our current climate demands innovative steps to research access and publication. Your article will reach thousands of our followers and subscribers, with opportunity for follow-up features in our various projects.
