

Al- Mashaan Security Systems

المشعان للأنظمة الأمنية

Founded in February 2015, Al- Mashaan Security Systems has quickly emerged as a leading supplier and solutions provider for anti-shoplifting systems. We began our journey providing only maintenance and repair services for anti-shoplifting systems exclusively. Building on that foundation, we have grown into a company that supplies and services most security needs. These include Electronic Articles Surveillance, Network Camera Surveillance, Closed Circuit Analog Cameras, Access Controls, Intrusion Alarms, Time Attendance, Biometrics Systems, IP Phones, IP Switches, Public Announcement Systems, Que Management, and Point of Sale Systems.

Our Clients

Our Products

- **Electronic Article Surveillance:** Best anti-shoplifting solution to protect stores from theft by attaching tags and labels into merchandise that will cause the system to alarm when attempting to exit the store with stolen items.
- **IP Cameras:** State of the art technology in surveillance solutions for large projects and high security locations.
- **Analog Closed Circuit Cameras:** HD Analog cameras are a hybrid between the low cost infrastructure of analog systems and the high definition of IP cameras.
- **Intruder Alarms:** Protect your home or business with alarms set to trigger when an intruder crosses a previously set threshold.
- **Access Controls:** Integrated solutions for all types of “access” needs and can also be used as time attendance terminals. Access granted through cards, fingerprint, iris scanner and face recognition systems.
- **Visitor Counter:** Installed at the entrance of a store and is used to better understand your customers and analyzing trends in their behavior.
- **IP Phones & IP Switches:** Connect with customers, colleagues and other business with the latest in PBX technologies and call center solutions.
- **Point of Sale:** Easily keep track of your sales and create invoice receipts with our user-friendly POS software and time-tested hardware and accessories.

Our Services

1. Consultation:

- Identifying the various possible security related solutions in addition to our customer's requirements at each location
 - Thorough analysis of the customer's requirement is studied, and a thorough site survey is conducted
 - Designing & planning the best possible customized solution for each project
-

2. Delivery, Installation, Configuration, and Commissioning:

- Complete list of items are delivered to the site prior to the installation
 - The technical team implements the project with thorough inspection at each point by the MSS engineers, staying in-line with the customer's requirements
 - Upon completion of the mutually agreed design, configuration is handled by our engineers
 - Systems will be integrated if needed to the customer's server or to a new server
 - All systems and solutions provided are tested and checked by our technical managers before being handed over to the customer
-

3. Handover and After-Sales Service:

- After finishing a installation and configuration, we handover the project to the respective team at the customer's side complete with thorough training for the authorized personnel
 - After handover is where MSS will shine compared to our competitors: our maintenance team will make sure any calls are answered and issues solved in a timely manner and with a professional attitude
 - Customer support is available at any time and will make sure your experience working with MSS is as comfortable and easy as possible
-

Why MSS?

At MSS we value two things above all else. Quality of service and quality of product.

Service: The thing you can expect from us at all times is customer service with no equal. Our technicians stay up nights into mornings to make sure your systems are in place and working perfectly. Our sales representatives are at your beck and call, they will answer calls even at midnight and later. Our management is willing to meet even the smallest customer to make sure you are getting the quality of service we promise.

Product: Our products are second to none. When we choose a product to represent, we check its quality first. If the quality is not up to par to our high standards, then we will decline to partner with them. You are in safe hands with us, so rest assured that we have your best interests in mind and heart.
