## Lessons Learned From COVID-19

The unprecedented pandemic that began in 2020 caused organizations to change their mindsets and attitudes...especially in terms of technology. Some things they learned:

- ◆ Most organizations were forced to utilize cloud-based technology or collaboration tools that they already owned but had previously been slow to embrace...and they discovered how well they really work.
- ◆ Employers realized their employees could be as productive or even more productive working from home where they had fewer co-worker distractions.
- ◆ Remote working also highlighted the challenge of maintaining staff morale and proved the importance of interactive tools such as video conferencing.
- ◆ The pandemic caused businesses to identify weaknesses and to accept change...,making them more adaptable and stronger for the future.
