

Already have an  
Aviary?  
We guarantee a  
better service  
level for your  
money

Bill Dreier has been in the woodworking business for over 20 years. His attention to detail and exquisite craftsmanship is easy to see in every aviary he produces.

He has successfully bred finches in his own aviaries for many years and fully understands the therapeutic value they provide.

His wife, Alesa, is a recognizable and much loved entertainer in many Care Homes throughout the Valley; they share a passion for making life better for everyone they meet.

We all know that pets have a powerfully positive effect on the health and wellbeing of people of all ages.

But it's been proven that the elderly, in particular, benefit with contact with animals, especially birds.

In one study, the introduction of an aviary into an elderly care facility was shown to reduce depression - both because of the stimulation created by watching the colorful, active birds, and the increased social interaction created by the presence of the aviary.

We offer several levels of maintenance service. Please give us a call for additional information. We would love to work with you today.

Agreement

SRL Services is a caring, local company providing affordable high quality, custom wood bird aviaries ON LOAN to special homes like yours.

We are a premier designer and manufacturer of custom designed bird aviaries. We do everything from constructing the woodwork to maintaining the aviary and the health of the birds.

A breeding aviary is the source of great excitement for residents, staff and families. Each aviary is environmentally stable, meaning that there is ample space for the adults to live their normal life cycle with enough room to raise their young.

To keep our birds looking their best, we include an extensive care and service package. The number one challenge in keeping birds is the mess they make. We feel that keeping them in acrylic aviaries makes this much less of an issue. In addition, we provide monthly visits that ensure that the aviaries, as well as the birds, look their best.

The products we use for cleaning are of the highest quality and are free of any toxins.

The feed we provide our birds is also of the highest quality. We ensure that the birds don't consume anything that has sat on a shelf for any extended period of time.

While on site we will:

- Examine and medicate birds
- Maintain scheduled bird immunizations
- Clip claws and beaks
- Disinfect entire aviary
- Remove and replace bedding, and branches, as needed
- Clean and disinfect nests
- Polish windows
- Repack nesting material
- Exchange or replace birds
- Repair aviary if necessary

We are your provider of the most colorful and vibrant birds.

We breed the birds ourselves; our goal is to ensure you receive the most fitting assortment of our feathered friends for your facility.

All accessories that are placed inside our aviaries have been carefully designed to ensure maximum benefit for the birds, while still blending in with the natural look.

These include the perches, feeders, nest boxes, and water sources.

Our aviary units include hand crafted accessories that are very "user friendly" for the birds.
