CAREER HISTORY

QA Automation Intern

Kazuhm | May 2020 to Present

- Create documentation and educated development team on Kazuhm's testing process
- Contributed to production code in React to improve testing
- Wrote unit tests using TypeScript, Node, Puppeteer and Gherkin to test product

Project Manager at Fandom Marketing

Digital Marketing Agency | April 2018 to April 2019

- Successfully introduced a new revenue stream to the company by submitting over 160+ quality images I photographed to a stock photography website.
- Oversaw the software development process of 3 WordPress Plugins which were used for an additional revenue stream for the company.
- Designed and created demo sites and graphics for 3 WordPress plugins.
- Effectively streamlined digital marketing project processes, increasing team wide efficiency.
- Ensured profitability of client projects by monitoring 5-10 team members' hours and progress.

Creative Director at Glass & Marker

Video Production Agency | February 2016 to August 2017

- Owned over 16 video projects end-to-end from concept to delivery, empowering client's funding rounds by meeting their video needs on time and under budget.
- Actively wore multiple hats outside my Creative Director role, helping save extra costs for both our company and the client.

PROJECTS

PLANT PARENTHOOD **Repository:** github.com/Zuzanav/plant-parenthood
Live Site: plantparenthood.herokuapp.com

- **Summary:** A web app that allows users to discover new plants ideal for their lifestyles, manage their plant's watering schedule and share their plant pics to a social feed.
- **Responsibilities:** Front End Developer. Built functionality of the app that displays watering schedule & frequency for each plant.
- **Languages and Tools:** React, Node, Mongo, HTML, CSS, Firebase, Auth0, Material-UI
