Zulu Exero 2202

Bone Conduction Headphones User Manual

How to set up your Zulu Exero 2202

1. Power-On and Pairing

When you pair the Bluetooth headphones for the first time (and the headphones is off), press and hold the  key for 5+ seconds and release it when you hear both the "Power On" and "Enter Pairing" voice notifications. The LED light will flash red and blue when in pairing mode.

2. Connecting

Enter the Bluetooth settings on your phone, scan for new Bluetooth devices and select "Zulu Exero 2202". When the connection is made, you will hear a "connection successful" message. If the connection attempt has failed, please repeat the above.

3. Power-Off

To turn off the Zulu Exero 2202, hold the  key for 3+ seconds, the headphones will give a "power off" message.

4. Reconnecting

If already paired, the headphones will be re-connected in a few seconds after powering on.

5. Disconnect and Pair with Another Phone/Device

Turn off the headphones and switch off the Bluetooth connection of the first phone/device. Then repeat Step 1 with another Bluetooth enabled phone/device.

6. Use Siri

If the headset is connected to an apple IOS device, you can use the Siri virtual assistant. Make sure that Siri is enabled on your IOS smart device (iPhone/ iPad). To use Siri: Short press the  button on the headphones to Start Siri. When you hear the Siri beep, you can speak. Please note that Siri can only be used on Apple IOS systems.

7. Charging the Battery

To charge the headphones' internal battery, connect it to a wall charger or PC. Use the supplied Micro-USB cable, connect the Micro USB connection on the headphones and connect the other end of wall charger/PC. The LED color will be red when charging and it will turn to solid blue when the battery is fully charged.

NOTE:

1. Please charge the headphones with a 5V DC USB charger or computer USB port.
2. It is recommended to fully charge the battery before first use
3. Do not remove or replace the battery as it will damage the headphones and will void the warranty.

2

Wearing the Headphones

As shown on Page 1, place the headphones around your neck with the speakers touching your frontal ear-bones. Don't place the speakers directly on/in your ears like a normal headphones, your ears should remain unplugged/uncovered.

A) Place against your frontal ear-bones

B) Place the upper curve over your earlobes

C) Allow the back rim of the headphones to curve around your neck. You may adjust to rest against your neck if desired, depending on your own comfort and neck size.

You can also utilize the included earplugs if you do wish to cancel out surrounding noise.

Troubleshooting

Problem	Possible Cause	Solution
Not powering on	Low battery	Charge the headphone
Bluetooth pairing unsuccessful	Beyond the maximum effective range	Place the headphone closer to the device which you want to connect with.

Maintenance

1. Keep the headphones in a cool and dry place. Its working temperature should be 0- 45 °C (32-113°F). Using in environments that are too cold, too hot, or too damp may shorten the headphones' service life.
2. Charge the headphones before use if it has not been used for a long time.
3. Do not immerse the headphones in water or other liquids. The Zulu Exero 2202 is drip resistant but may not be immersed into fluids
4. High volume may cause sound distortion and damage your hearing.
5. Clean the headphones with a dry soft cloth.
6. Keep the headphones away from hard and sharp objects to prevent damage.
7. Do not charge the headphones immediately after exercise as the residual sweat in the charging port may damage the headphones' circuit. To reduce the risk of damage, please keep the charging port dry before charging the headphones.

Warranty

This product comes with a 1-year warranty as from the purchase date. Please visit our website www.zuluaudio.com for further details.
