

# ODESSA RENIA

SALON  
*Health and Safety Standards*

## Stylist Responsibility

---

### *COVID-19 Training*

All stylists will receive training on COVID-19, as well as the company's safety and sanitation protocols. All stylists will be reminded of current policies, such as staying home if ill.

### *BARBICIDE® Training*

Each stylist will be required to take the BARBICIDE® COVID-19 Certification Course. Since 1947, Barbicide has been the industry leader for professional beauty and barber disinfection. It's EPA certified, hospital grade products, when used properly, have been found to be effective for use against Human Coronavirus, including COVID-19. This certification paired with the mandatory training requirements obtained during Cosmetology license qualification, demonstrates a professional commitment to delivering a safe service to our valued clients.

### *Wellness Check Upon Arrival*

Each stylist entering the workplace will have their temperature checked using a contactless thermometer. If the temperature is acceptable, the stylist can proceed to their station, first stopping to wash and sanitize their hands. If temperature is not acceptable, a secondary check will be conducted. If the high temperature is confirmed (above 100.4°F), they will not be permitted to enter the building and their appointments for the day will be rescheduled.

### *Personal Protective Equipment*

All stylists will be required to wear a mask or face covering. Gloves will be issued; however, they will not be required to be worn at all times. Stylists will be instructed to use a combination of frequent hand-washing and sanitizing options in lieu of wearing gloves. Reusable masks will be assigned to all stylists. Stylists will be provided guidelines on proper mask hygiene per CDC.

## Cleaning Products and Salon Protocols

---

*Our salon uses cleaning products and protocols that meet EPA guidelines, are approved for use, and effective against viruses, bacteria, and other airborne and bloodborne pathogens. We are continuing to work with our vendors, distribution partners and suppliers to ensure an uninterrupted supply of these cleaning supplies and that necessary PPE is available.*

### *Stylist Stations*

Stylists will practice proper infection control by cleaning and disinfecting their station, as directed by the State Board of Barbering and Cosmetology. Each chair will be properly cleaned and disinfected upon opening and after each client service is completed. Stylists' stations, rolling carts, and drawers, along with any containers used for storage will be cleaned and disinfected at the end of shift. All non-porous implements (shears, brushes, combs, clips, etc.) will be cleaned and disinfected after each use.

### *Shampoo Bowls*

Shampoo bowls, handles, hoses, spray nozzles and shampoo chairs will be clean and disinfected after each client.

### *Public Spaces and Communal Areas*

Odessa Renia Salon utilizes cleaning products and protocols that meet EPA guidelines, are approved for use, and effective against viruses, bacteria, and other airborne and blood borne pathogens. We are continuing to work with our vendors, distribution partners and suppliers to ensure an uninterrupted supply of these cleaning supplies and that necessary PPE is available.

### *Restrooms*

Restrooms will be cleaned and disinfected upon opening and at closing of the salon. Frequent surface disinfection will occur continually during hours of operation. Single use paper towels dispenser is installed in the restroom for use.

### *Air Filter and HVAC Cleaning*

Frequent air filter replacement and HVAC system cleaning will take place throughout the property. Additionally, the salon installed an Amaircare 4000 VOC Chem Airwash Filtration System — a high-quality HEPA air purification unit.

*Please note that Odessa Renia Salon is committed to providing a safe and secure environment for all its guests and employees and will use reasonable efforts to implement the plan set forth herein. However, due to numerous factors outside of our control, including the uncertainty of availability of supplies and materials, ever-evolving governmental mandates and regular dissemination of new public health information, we make no representations, warranties or guarantees, express or implied, regarding the implementation of the following protocols and procedures, all of which are subject to change. Due to the dynamic nature and rapid evolution of public health emergencies and the responses of governmental officials, conditions may change more quickly than this policy can be updated. As a result, you should not rely on a specific policy or procedure outlined in this policy being in place at the time of your visit to our salon. While we look forward to welcoming everyone back, we sincerely encourage all clients to closely consider the current CDC guidelines and available public health information prior to visiting.*
