

#4 A, \$1,100-\$1,300

#4 B, \$1,200-\$1,400

#5 I, obverse,  
\$1,900-\$2,100

#5 I, reverse,  
\$1,900-\$2,100

### #3 - Mid-1933 model

1933 models without lines. During this time frame the case was shortened 1/4 inch. The hinge plates were still located on the outside of the case and still had three barrels attached to them. A few 1933's were produced that were shorter, like those produced later on in 1933, 1934, and 1935, but they didn't have diagonal lines cut on the face of the lighter. They are extremely rare.

#3 A - Plain

#3 B - Metallique Initials

#3 C - This variant has a generic metallique applied to it.

### #4 - Late 1933-35 model (with diagonal lines)

This model is similar in design to access #3, with the exception that it has diagonal lines.

#4 A - Plain

#4 B - Metallique Initials

### #5 - 1935 model:

1935 marked the beginning of "Specialty Advertising" on lighters. It is impossible to tell the difference between a plain late model 1933, a 1934, or a 1935 model. During this time frame some advertising logos were done using metalliques and some were line drawn. They were all manufactured with three barrel hinges and the patent pending logo was still stamped on the bottom of the case.

I placed all advertising motifs in access #5 since 1935 marked the beginning of "specialty advertising" for Zippo.

#5 A - Oil Company Engraved Advertisers

#5 B - All Other Engraved Generic Advertisers

#5 C - Kendall Metallique

#5 D - Drunk Metallique (circa 1935-39)

5D & 5E

#5 D is actually a line drawn illustration but it provides you some idea of the metallique motif. #5 D (Circular Border); #5 E (Rectangular Border). Both have the same basic design

#5 E - Drunk Metallique (circa 1935-39)

#5 F - Scotty Dog Group Metallique

#5 G - Gulf Metallique

#5 H - I grouped all other generic metallique advertisers together as far as price and rarity.

#5 I - Salesman's Sample (Includes Town and Country Sloop, Sports Fisherman, and Flag Emblem motifs)
