

From Competition to Collaborative Community

Training and Coaching for transforming leadership

On-line training with coaching support will introduce you to transforming leadership practices. You will get practical tools for strengthening your leadership:

- Be introduced to a leadership system that promotes an open and collaborative climate throughout your church community.
- Engage in a self assessment of your leadership behavior.
- Identify growth areas and supports for taking action.

Key to leadership for the church is fostering a collaborative atmosphere in which trust and mutuality exist. Such a climate is a prerequisite for creative ministry and transformative change. Transforming leaders model the church's deepest vision of its calling and cultivate a common life that embodies the gospel.
