

2021-22 Commercial Lionfish Harvest Program

Requirements & Application

Background

Lionfish are a non-native, invasive species to Florida that have the potential to significantly alter the native marine habitats, impact recreational and commercial fishing, and overall economy of Florida. The Florida Fish and Wildlife Conservation Commission (FWC) encourages the removal of all sizes of lionfish from Florida's waters. While other technologies are being developed and tested, currently the most-effective method to remove lionfish is by divers using polespears and other lionfish-specific spearfishing equipment. Localized removal efforts, including lionfish tournaments, have been shown to be effective in reducing lionfish populations.

Program Overview

Goal: To increase the number of commercial lionfish harvesting trips and the number of lionfish removed from Florida waters. To maximize harvest pressure, the FWC has created several incentive programs to encourage recreational and commercial divers to harvest lionfish. While the commercial market for lionfish provides incentive for divers to harvest lionfish and sell their fish to licensed wholesale dealers, this program was established to provide an additional incentive and maximize commercial harvest effort. The commercial harvest program is only open to commercial harvesters that hold a valid and current FWC issued Saltwater Products License.
