Our Goal is GREEN
Reduce restrictions in three easy steps

1. **MASK UP**
The easiest and most effective way to control spread is to wear a mask in public and around other non-household people.

2. **SHOP IN A SAFE MANNER**
Send only one person to shop, wear your mask, and support local business as much as possible! Reduce your travel, too.

3. **GET TESTED**
New Mexico’s framework is based on how many people are tested, and how many test positive. Catching asymptomatic spread, masking and safe shopping reduce our numbers, but we need more tests over all to bring down the positivity rate.

Symptomatic or asymptotic. You will need to zoom into a private video conference with a testing supervisor as you self-administer the test. Then you ship it in to lab.

**Businesses are depending on us to get in the GREEN! Do your part to limit spread and reopen our local businesses!**
