

Electrical Products

Lutron Electronics is a privately held company headquartered in Coopersburg, PA. Lutron light control products range from individual dimmers to total light management systems that control entire building complexes. On the commercial side, light controls are essential in hotels, restaurants, retail stores, conference facilities, educational facilities, hospitals, museums, and public spaces. On the residential side, light controls are installed everywhere from single-room apartments to palatial homes. In almost 50 years of innovation, Lutron has invented hundreds of lighting control devices and systems. The company has advanced the technology of lighting control while maintaining top market position by focusing on exceptional quality and design.

SurgePure provides industrial surge protection for mission critical environments. Known across North America as the most reliable longest lasting surge protection device on the market today. Since 1974 SurgePure has proven to be the real pioneer in the surge protection industry with their line of performance products. SurgePure's industrial surge protection devices are rated foremost in the industry because of a unique '*Non-Degrading*' design. You will not be left second guessing if you're protected or not with SurgePure's premium '*Single-Element*' surge protection systems.

nVent Nuheat Floor Heating Systems are ideal room specific heat source options for both new construction or renovation projects. These easy-to install systems are available for a range of floor surfaces, including tile, stone and laminate/engineered wood floors. From standard cable, mesh and mat floor heating solutions to cable solutions with uncoupling membrane or made-to-order custom mats, we have designed our products to make it easy for you to install them. nVent Nuheat Floor Heating Systems are energy efficient and can be controlled using innovative and energy-efficient thermostats options.

Protect people, processes and critical electrical circuits during a fire or other emergency with nVent PYROTENAX two-hour fire-rated cables. A specialty wire used to power emergency response equipment such as fire pumps, fire fighter elevators, smoke extraction fans, backup generators and more. Worldwide regulations require fire protection for emergency feeder circuits in commercial buildings, public spaces, hospitals, industrial plants and refineries. PYROTENAX System 1850 mineral insulated fire-rated cables are UL listed and can withstand temperatures up to 1850 °F / 1010 °C for two hours, ensuring critical equipment and processes continue to operate in the event of a fire.

Industrial: As the world's largest provider of complete electrical heat management systems, primarily for the general process, oil and gas, chemical, and power generation industries, we provide industrial heat trace products and turnkey solutions.

Commercial: We provide quality solutions for winter safety, comfort and performance to building and infrastructure design, construction, operation and maintenance professionals.

Residential: We keep people and infrastructure safe from harm, enhance building performance, and bring comfort into the home.
