DSCSA SERIALIZATION TURNKEY SOLUTION

RxChain

Standard Edition

RxChain® DSCSA SERIALIZATION SOLUTION

RxChain® is a turnkey DSCSA Serialization Solution for manufacturers, distributors, repackagers, and dispensers. It meets the requirement of Track-n-Trace and serialization with robust serial warehouse capabilities and native APIs for ERP integration. RxChain® Cloud Solution, coupled with RxChain® Mobile Apps, enable powerful value-added operations to error proofing customers' supply chain and track meaningful supply chain metrics. RxChain® adheres to the industry standards including GS1 and Healthcare Distribution Alliance (HDA), as well as all business requirements from the wholesale distributors.

RXCHAIN® SOLUTION FEATURES AND CAPABILITIES

RxChain® Solution is consisted of RxChain® Cloud and RxChain® Mobile. It tracks the entire serial number life cycle from integration to dispensing. It integrates with various business systems including ERP, WMS, and EPCIS systems. The Cloud solution is hosted in a FDA qualified environment and the Mobile solution is compatible with Android, iOS, and windows mobile OS.

RxChain® Cloud Solution

RxChain® integrates and exchanges data with packaging lines, CMOs, Suppliers, 3PLs, and wholesale distributors in a flexible and scaleable manner.

- Rx Master Data
- Serial Data Repository
- Track and Trace reporting with 3Ts / ASN
- Serialization EPCIS 1.0, 1.1, 1.2
- FDA Audit Reports
- Automated and manual Serial Request
- Shipment Notification in ASN and EPCIS
- Error notification and in-app re-process

RxChain® Mobile Solution

Supply chain is the single most important factor to delivery Rx products to customers and patients. RxChain® mobile solution offers robust warehouse capabilities for inventory transactions and supply chain visibility. Integrated with scanners, cameras, and smart devices, RxChain® captures serialized event data throughout the warehouse operations:

- Receiving and QA receipt accuracy
- Packing and shipping serialized and non-serialized Rx
- Inquiry, Verify, and Warehouse Reconciliation
- Packaging aggregation and shipment aggregation
- Returns and dispensing
- APIs for ERP and WMW integration

RxChain® Portal Solution

RxChain® Portal is an effective, secure, and easy way for users outside of the firewall to retrieve their relevant DSCSA serialization data. RxChain® Portal has the following capabilities:

- Admin user and user roles
- User authentication
- Data encryption
- Access to 3T track and trace report
- Access to EPCIS data

RxChain® Dashboard

RxChain® Dashboard provides a comprehensive overview of your business vitals including sales, contract, supply chain, workers' performance and more, enabling visibility, collaboration, and business decisions:

- 28 KPIs
- A Day in the Life of Serialization
- Extended Visibility About Trading Partners

BENEFITS

It's crucial to invest in a comprehensive solution that is integrated, scalable, configurable, and interoperable. RxChain® meets those needs and provides additional benefits, helping you:

- Reduced overall serialization spending
- Compliance to DSCSA Serialization
- Value added supply chain operations and visibility of supply chain metrics
