

ROI Financial Advisors, LLC Podcast Disclosures:

- Lance Johnson is an investment advisor representative of ROI Financial, an SEC registered investment advisor. Neither Mr. Johnson nor ROI Financial are affiliated with nor do they warrant or endorse any products or services referenced by any other presenter or vendor on the Get Rich Slow Podcast website. Any comments or opinions presented on the Get Rich Slow podcast prior to or during the interview with Lance Johnson of ROI Financial are the opinions and comments of the interviewer.
- The Get Rich Slow podcast site is produced by Avery Whaley. Mr. Whaley is not related to ROI Financial. Adrian Schermer and Robert Delavan may host and interview podcast presenters. Both Mr. Schermer and Mr. Avery are clients of ROI Financial.
- Mr. Johnson or the podcast hosts may refer to ROI Tax LLC during the podcast. ROI Tax, LLC is an affiliate of ROI Financial, but is a separate entity. LMJ Enterprises, LLC (solely owned by Lance Johnson) and Robert Delavan are part owners of ROI Tax, LLC. ROI Tax, LLC is a tax preparation service. ROI Financial and ROI Tax, LLC may refer prospects to each other. Clients and prospects are not obligated to use the services of either firm. Client's personal information is not shared unless directed to do so by the client.
- Individuals associated with this podcast production and ROI Tax LLC, may be members of Business Networking International (BNI®). BNI® is a networking and referral organization. Members mutually refer potential clients to each other. ROI Financial pays a membership fee but does not receive nor pay any fees for individual referrals. Private customer information is not shared with members of the referral network unless directed to do so by the client. ROI Financial clients are offered an opportunity to use the services of other BNI® professionals but are not required to.
- Clients and prospects should do their own due diligence.
- Certain links in the Get Rich Slow site connect to other web or social media sites maintained by third parties over whom ROI Financial has no control. ROI Financial makes no representations as to accuracy or any other aspect of information contained in the other sites.
- The information presented in this podcast by Lance Johnson does not constitute a complete description of ROI Financials' advisory services and is for educational purposes only. The information is designed to help potential investors understand general concepts of investing and wealth management and should not be construed as investment advice.
- This presentation is in no way a solicitation or offer to sell securities or investment advisory services. Investing involves the risk of loss and investors should be prepared to absorb such a loss. Past performance is no indication or guarantee of future results.
- The more money a client invests with ROI Financial the more money we make as a firm, since the fees we collect are billed on assets under management.

- Prior to making an investment in securities or real estate, we recommend consulting with the appropriate attorney, real estate, tax, or financial professional to determine if the discussed strategies or investments are suitable for you
- Trading on margin enables you to leverage securities you already own to purchase additional securities, sell securities short, or access a line of credit. While there are many benefits to establishing a margin account, it's also critical to fully understand the risks before you get started. Margin can magnify your losses just as dramatically as it can boost returns. Your brokerage firm will require you to maintain a specific percentage of equity in your account, depending upon the types of securities you own and whether you borrow money to buy additional shares or sell short.
