The FP is the Forte Professional humidifier. It produces a superior quality, fine fog that can be easily directed & controlled. The FP can be used in hatcheries and small spaces where it is not possible to install the machine inside as well as in cooling rooms, greenhouses, cellars, food banks, and in various manufacturing facilities to maintain precise humidity levels for optimum production.

All Forte Humidifiers have been carefully designed and constructed with materials that resist corrosion from water and acids, and thus can be used as chemical applicators. Installation requires only a standard power connection and water source. The fog rate for each model is easily adjustable by a manual valve to achieve the desired amount of humidity or cooling. By operating without nozzles which are more subject to clogging, Forte Humidifiers are able to work in almost every environment, ensuring reliability and durability over time. Forte Humidifiers are a cost effective, low maintenance solution for your humidity and cooling needs.

## Specs:

Adjustable Fog Rate:	0-1.5 gallons per hour
Air Flow:	212 CFM
Voltage:	120V, 60HZ*
Power:	420W
Weight:	24.2 pounds
IP Rating:	56
Height:	20.0 in
Width:	15.8 in
Depth:	16.5 in

\*Different voltage, frequency available upon request
