Poly-Crete Natural SL comes standard as "Natural Base." May be used unpigmented (natural) or pigmented on-site with available pigment packs.

NOTE: Differences in chemical composition, thickness, application methods and jobsite conditions may cause slight variations of individual colors across the various products. Colors may also be affected by age, heat and exposure to ultraviolet light from natural sunlight and overhead lighting (non-UV stable products). Dur-A-Flex recommends obtaining an actual color sample for best representation.
