

Antimicrobial

EHG Antimicrobial

EHG's new antimicrobial coating is one of a kind. The treatment is listed by the EPA as a proven inhibitor of algae and mold. Call today for EHG Antimicrobial products in Single Wall, Double Wall, and Flat Oval systems.

Advantages of using EHG Antimicrobial

- effective agent for disease producing bacteria (Gram+ & Gram -), fungi (mold & mildew) and algae growth
- chemically stable and non-toxic- contains no heavy metals or volatile compounds
- factory-applied and has the same lead-time as regular coated products
- environmentally friendly- it will not leach or outgas
