

Community Health Plans

Partnership in Healthcare

Why not become a Partner with your local Hospital? The **Community Health Plan (CHP)** was

developed in conjunction with local employers and hospitals to ensure that they are bringing you the appropriate healthcare with the best possible treatment at the most affordable cost. We also work with local employer groups to build a Health Plan that works for them. Insurance companies have clouded the water so much that it has become impossible to understand where your healthcare dollars are being spent. The CHP hospitals are all cutting out the “middleman” so to speak, in order to bring the most affordable healthcare possible to the community. This in turn helps bring the local employers health insurance costs down so they can continue offering lower deductibles and co-pays.

Transparency:

By cutting out the middleman, we are able to utilize a fee schedule for all services performed at the local in-network hospital. This transparency is not found anywhere else in the market place except with our hospitals and employer groups participating in the program.

Cost Effective:

The confusion of layers of entities in the middle of the delivery of your healthcare causes the cost to be unduly high. We cut out these layers and provide a product that is just between you and your Doctor. This along with a negotiated fee schedule of services allows us to price your Health Insurance very competitively.

Plan Offerings:

- Self-Funded Health Plan options
- Multiple Prescription Drug Plans
- Complete In and Out of Network options
- Competitive Premiums
- Profit Sharing programs
- Concierge Patient Services
- 24/7 Doctor access via phone
