**COMPACT WEAPON LIGHT
GEN IV**

MPN: PAWL-3BKGENIV

UPC: 8 18500 01277 1

INTRODUCTION

The Primary Arms Compact Weapon Light, Gen IV is bright, simple, and extremely tough. Gen IV features 800 lumens of white light and a maximum run time of approximately 2.5 hours. Shock proof and water resistant, this tough light is ready to serve on heavy recoiling firearms even in harsh conditions. Fully captured batteries, high spring force battery contacts, an industry leading LED emitter, aerospace grade materials and premium anodization make the Gen IV the perfect choice for your firearm.

TAILCAP PUSH BUTTON

Press the soft rubber button mounted in the tailcap gently to activate the light momentarily. Releasing pressure on the button will immediately deactivate the light. Pressing the button more firmly will result in an audible and tactile “click”, activating the constant-on mode. Once the button has clicked you can remove your hand from the tailcap and the light will stay on. Press firmly again to click the light off.

OPTIONAL TAPE SWITCH

The push button tailcap can be replaced with our matching SBTS tailcap incorporating a remote tape switch and 8-inch cable. The flat dark earth anodized SFDTST tailcap will also fit and function. Press the tape switch to momentarily activate the light, and release again to deactivate the light. The tape switch tailcap is not included and can be purchased separately.
