

AYODELE JOSHUA I.

Ayodele Joshua is a technology solutions and business management specialist, currently serving as the Managing Director of Royford Technologies Int'l Limited, a technology company with a mission to create handy tech solutions with super-efficiency, leveraging on big data.

Josh has worked as a Senior Consultant and managed several organizations, having risen to top-level management positions in almost all the organizations he worked. During this period, he trained and consulted for government (at all levels), multi-national, non-governmental/non-profit organizations and individuals - including the World Bank, National Identity Management Commission, USAID, NIALS, PenCom, Galaxy Backbone Plc, and for over 10 states of the Federation.

Josh advises and works with various organizations and groups that are trying to leverage on the various aspects of artificial intelligence, blockchain technology and big data to create solutions that can serve national and global interest. One of such is the e-Voting Nigeria, a global group of technology enthusiasts working on leveraging on using the national identity database and blockchain technology to enhance the current electoral and voting system in Nigeria.

Josh has several security solutions that currently being considered for implementation for government at various levels. His enthusiasm for enhancing national security has earned him reputation as Security Solution Specialist among his peers and brought him before chiefs in the industry. *Special attention being given to a new software solution currently being reviewed for national implementation at the NPF. The solution is going to use Artificial Intelligence and machine learning to cut down the rate of crimes and criminalities in the nation.*

Ayodele Josh holds a Bachelors' degree in Statistics and has over a decade hands-on and field experience in diagnosing organizational systems, building strategic human capital management systems in organizations, programme and project management, technology solution and product management and helping to transform ineffective management and leadership.
