

JOB DESCRIPTION

Date: June 3, 2019

Title: Process Laboratory Technician

Category: Full time with benefits package, non-exempt

General – Laboratory:

Provide assistance in the planning, set-up, conduct, and reporting of dry process machinery tests performed in the Sturtevant Process Laboratory.

- Requires practicing skills in mechanical assembly, machinery operation, test conduct, post - test cleanup, data acquisition and analysis, process material safety evaluation, customer sample preparation and report writing.
- Requires the ability to work alone with minimal supervision or within a small group to accomplish sample batch testing of customer supplied material in Sturtevant process equipment.

Training/Education Requirements:

Hands-on mechanical skills and PC skills including MS Word and Excel proficiency. Associates Degree in Mechanical Engineering Technology or equivalent training/experience preferred.

Experience:

5 – 10 years with strong mechanical aptitude and demonstrated hands-on expertise based on previous work experience.

Experience working in an environment with minimal supervision and where strong interpersonal skills are essential.

Reporting Relationships:

Reports to the Process Laboratory Manager
