Matthew Heines	Congressional District 1	States No Party Preference		
Justin Smoak	Congressional District 1	States No Party Preference		
Derek Chartrand	Congressional District 1	GOP		
Jeffrey Beeler, Sr.	Congressional District 1	REPUBLICAN	Likely (Frem statement; no survey yet)	Parental Right to make decisions for myself and my family without the state mandating medical interventions or making them necessary to be able to participate in society. I believe that the government should not force health decisions on you or your family. School Health Curriculum - Parental Right that delicate topics including Sexual Education be taught in the home and not in a school setting. Vote to Reject R-90. SB5395 is the sexualization of our children and should be stopped. Homeschooling - Parental right to educate children as they see fit and minimize regulations around homeschooling. My family is a homeschooling family. We chose this to have parental oversight and to make sure our children were being taught by utilizing our faith in our teaching.

2020 Congressional Candidates				
Candidate by District	District	Party Preference	Likelihood of Support Based on Health Choice Survey	Statement
Pramila Jayapal	Congressional District 7	DEMOCRATIC		
Rick Lewis	Congressional District 7	INDEPENDENT	Very Unlikely	I would happily be banned from public service for life, if in the process I could convince the parents who prevent their children access to this life saving technology, to embrace it. People talk about choice, but what choice does a child have when their parents have embraces a conspiracy theory and deny them a right to live. Denying a child vaccines is the same as denying them antibiotics or chemo therapy. Why would anyone want their child to get sick and die?
Craig Keller	Congressional District 7	REPUBLICAN		
DISTRICT 8				
James Mitchell	Congressional District 8	DEMOCRATIC	Very Likely	Adults and Parents need full autonomy and accepted self-responsibility for their & their family's health choices. Vaccine requirements are not our government's responsibility nor should be government's opportunity to demand, require or enforce. There is NO existing safety data for medical practitioners to rely upon to ensure one shall not be injured or caused death from a vaccine. Especially since the illnesses children are at risk, are not deadly for most. I had all common childhood temporary diseases and suffered no long term negative effects. Especially compared to the RISK of the vaccine that may only positively effect up to 60% of those its provided to anyway. No positive guarantees and yet the guaranteed "RISK" is there!
Corey Bailey	Congressional District 8	INDEPENDENT	Very Likely

Candidate by District	District	Party Preference	Likelihood of Support Based on Health Choice Survey	Statement
Jesse Jensen	Congressional District 8	REPUBLICAN	Unlikely	I believe that children should be vaccinated but I also support informed consent. When my wife and I vaccinate our children we always ask for the inserts and I believe that some kids have been injured by vaccines.
Kim Schrier	Congressional District 8	DEMOCRATIC	Very Unlikely	Sponsor of HR 2862
Ryan Dean Burkett	Congressional District 8	States No Party Preference		
Dave Saulbio	Congressional District 8	TRUMP REPUBLICAN		
Keith Arnold	Congressional District 8	DEMOCRATIC		
Keith R. Swank	Congressional District 8	REPUBLICAN	Very Likely	I believe in freedom to choose how you live your life.
DISTRICT 9				
Jorge Besada	Congressional District 9	LIBERTARIAN	Very Likely	I oppose all government mandated/coerced medications like vaccines for all potential ailments. If public schools do not want to allow unvaccinated kids parents should get their taxes back. Actually, I'm for abolishing public education anyway. One more reason to allow more choice and competition in schooling. Parents can then send their children to schools where they are vaccinated and other parents can send their kids where they might not be vaccinated. Competition allows us to discover what is the better outcome and for competition to work people must have freedom.

2020 Congressional Candidates				
Candidate by District	District	Party Preference	Likelihood of Support Based on Health Choice Survey	Statement
Joshua Campbell	Congressional District 9	REPUBLICAN	Very Likely	Children are being indoctrinated in schools. I'm a certified teacher and know how they are doing it. The Native American requirement to be included in curriculum enacted in 2015 reveals a lot (I'm not opposed to teaching NA topics). HOW they're doing it is what I oppose. It is currently the only subject that schools are REQUIRED to use the state's curriculum. Scripted lesson plans are mandated. This is exactly what will happen w/ other subjects, including CSE, if we don't stop it. Also, I have a Master's degree in teaching and WA state certification for History/Social Studies. I planned to teach in public schools. After going through student teaching and seeing first hand how bad it is-- I refused to let my son go into public schools. My wife and I homeschool our children as a direct result of those experiences.
Doug Basler	Congressional District 9	REPUBLICAN	Very Likely	
Adam Smith	Congressional District 9	DEMOCRATIC		
DISTRICT 10				
Jackson Maynard	Congressional District 10	REPUBLICAN		
Todd Buckley	Congressional District 10	INDEPENDENT		
Nancy Dailey Slotnick	Congressional District 10	REPUBLICAN	Likely	I support strong informed consent laws, but do believe that we need to ensure that it is truly informed by ensuring that accurate and complete data is provided before allowing parents or individuals to opt out. Having made the tough decisions about whether or not to give my child "optional" vaccines such as the vaccine for bacterial meningitis, thorough and scientifically accurate literature as well as consultation with the pediatrician were all crucial.
Kristine M. Reeves	Congressional District 10	DEMOCRATIC
