<b>STATE TREASURER</b>

Mike Pellicciotti	DEMOCRATIC			
<b>STATE AUDITOR</b>				
<a href="#">Chris Leyba</a>	REPUBLICAN	Very Likely		As a student of biology I do believe there are vaccinations that have saved lives throughout the course of history. However I also acknowledge that the sheer amount of ingredients that have gone into these medical treatments over the years has skyrocketed and we are often rushing some of these to market without understanding the long-term effects of some of these. I believe that proven and substantiated medicine should always be encouraged but the proven and substantiated part is vital.
Pat (Patrice) McCarthy	DEMOCRATIC			
<b>ATTORNEY GENERAL</b>				
<a href="#">Matt Larkin</a>	REPUBLICAN	Very Likely		I am absolutely opposed to SB-5395...My wife and I's signatures are on R-90. It must pass and when it does, it will give me great joy to defend it as Attorney General. Also, As a father of 4 little kids, we are wrestling with vaccinations and the scientific studies that are coming to light. They need to be studied further and public policy should be reflective of these studies. Also, I am very supportive of parents who choose to home school their kids. That choice is more important now than ever.
Bob Ferguson	DEMOCRATIC
