Thomas R "Tom" McGarry	2	LEG DISTRICT 06 - HOUSE	DEMOCRAT	campaign@time4tom.com			
VIRGINIA C. GRAHAM (JENNY GRAHAM)	2	LEG DISTRICT 06 - HOUSE	REPUBLICAN	jenny@votejennygraham.com	Favorable	Likely	I support informed consent and individual choice regarding vaccines. My family and pets are vaccinated with no adverse effects. That was our choice to make. As a mom I support outside testing for pharma companies in the interest of testing transparency. That said, learning about vaccines, and listening to both sides of this issue is important. Sadly, I'm under attack because I didn't support denying children an education for any reason. School vouchers would help this issue. I also don't understand why both sides wouldn't support outside testing for transparency and accountability. I do understand why some do not support vaccines and I respect their right to choose.

DISTRICT 19							
JIM WALSH	1	LEG DISTRICT 19 - HOUSE	REPUBLICAN	jim@electjimwalsh.org	Very Favorable	Very Likely	The COVID outbreak is an opportunity to remind families of their rights to privacy, parental choice and independence from overreaching government mandates. SB 5395: The supporters of 5395 in the WA House used parliamentary tricks--unsuccessfully, as it turned out--to suppress floor debate. When those efforts failed, they reverted to ad hominem attacks against those of us who opposed. It was a low moment and showed how craven their support of 5395 is. They don't want open debate about the wretched bill. I was one of the several legislative co-sponsors of Referendum 90; the day we delivered 270K signatures to the WA Sec of State was the proper high moment in response. Homeschool: I support home schooling as a ready option for every family in WA. I would like to see educational resources--money--be portable with every young student.

DISTRICT 21							
Brian C. Thompson (Brian Thompson)	1	LEG DISTRICT 21 - HOUSE	REPUBLICAN	ThompsonB@USA.com		Very Likely	Informed consent is challenging for a health care provider to obtain from a patient when the provider themselves is uninformed or ill-informed. For example, immediately after the birth of my last child, when they asked if we wanted the Vitamin K shot I asked what was in it. I was told it was just Vitamin K. Having done my own research since, I've learned that answer was incorrect - I was misinformed. It seems like too much to expect for each provider to be informed about everything. So, rather than expecting the provider to do sufficient research to present an unbiased position, we could create and require a form to be signed by the parent or guardian prior to administration of a mandatory vaccine. The form could present information much like the summary of a ballot measure, written by an independent entity, and even include statements by experts for and against with rebuttals. It could even be provided prior to the visit so that there is a waiting period (similar to buying a handgun). Because once you pull the trigger on a shot, there's no undo button.

Tamra Smlanich	2	LEG DISTRICT 32 - HOUSE		Tamrepresents@gmail.com		Very Likely	Health Choice: Each person should have health choice. I am proposing a bill to add in the legislature a law to protect non vaccine takers into a protected class so those individuals are not discriminated against in Washington State. SB 5395: There are higher priorities in our education system that should be first and foremost taught. Homeschool: Many parents/ guardians do not know the benefits of home schooling and it would be nice if the State would be more proactive in providing info to the public that home schooling is an option and the ways the State currently supports home schooling.

David Wiley	2	LEG DISTRICT 38 - HOUSE	LIBERTARIAN	david4liberty@protonmail.com		Very Likely	With regards to mandatory vaccinations for public schools I am sensitive to the desires of some Parents not to have their children be forced to either be vaccinated or forced association with unvaccinated children. I support Parents being able to make informed choices either way and that there should be no compulsion. Public school policies when necessary should support the majority of students and parents in their district. Regardless no child should be denied access to an education and I believe such a denial would be unconstitutional under our state constitution. I hold to a Voluntaryist philosophy of governance as enshrined in Washington State's constitution. "All political power is inherent in the people, and governments derive their just powers from the consent of the governed, and are established to protect and maintain individual rights."

Eric Brown (Eric J. Brown)	1	LEG DISTRICT 46 - HOUSE	REPUBLICAN	brown.eric612@gmail.com		Very Likely	It is our understanding that there were zero deaths attributed to COVID-19 of students enrolled at K-12 schools throughout Washington. Mandatory vaccinations appear therefore, unwarranted and illegal. We actively advocate for legislation that reopens schools and compensates Washington families for shutting down operations due to a health threat which had a negligible effect on health in schools.

DEBRA ENTENMAN	1	LEG DISTRICT 47 - HOUSE	DEMOCRAT	Riall@prisimwashington.com	Unfavorable	Unlikely	I believe that vaccine guidelines should be informed by science and strong medical advisories. When health mandates regarding vaccination for education or work are developed, we need to center them on an equity lens and take into consideration that every family's situation is unique. This means evaluating the underlying factors of poor health access, loss of health insurance coverage due to Covid-19, and other issues of health disparities that influence individuals' ability to access safe and medically informed vaccination.

PAT SULLIVAN	2	LEG DISTRICT 47 - HOUSE	DEMOCRAT	pat@votepatsullivan.com	Unfavorable		
Theodore Cooke (Ted Cooke)	2	LEG DISTRICT 47 - HOUSE	REPUBLICAN	Ted.cooke@outlook.com		Very Likely	Because of the Public Safety Act of 1944 vaccines are not treated as drugs but as simple "biologicals" such as milk fat or blood plasma. Because of this they are not subject to the same testing, reporting and legal remedies for fault as drugs. This is bad policy because the delivery medium and methods of vaccines are often not biologicals but classic drug delivery medium and methods. As such vaccines should be classified as drugs and be subject to the same testing, reporting and legal remedies for fault as drugs are under U.S. Code Title 21 Chapter 9 Subtitle V. Furthermore parents should always have complete control over children's health decisions, counseling, treatment, procedures, and administering of any medical substances. When children are in schools or on any government or public property they are still 100% under the ultimate authority and protection of their parents, and neither schools nor the state should ever try to subvert parental authority.

DISTRICT 49							
Justin Forsman	1	LEG DISTRICT 49 - HOUSE	REPUBLICAN	Welcomeibertyback@gmail.com		Very Likely	Health Choice: It's quite obvious to me that vaccines are not proven to be safe and if they were, why would they need liability from vaccines that they manufacture. They are clearly damaging the lives of countless people around the world, including people very close to me. I do not support vaccines even to the extent that I am potentially anti vaccine at least until they can be proven to be safe and liability protection is removed from the manufacturers. SB 5395: Sexual health is important, however I would rather it be up to the parents to teach their children, then the state with it's very own agenda to be the ones to sexualize children. The state does not have the best track record or our interests as heart. Homeschool: I think home schooling is a great alternative to public education. I am not super impressed with public education or it's mandates to take unsafe vaccines to be indoctrinated in nsvchological programming

Llafet Nathaniel P (Park Llafet)	2	LEG DISTRICT 49 - HOUSE	REPUBLICAN	friends@parkllafet.com	-	Very Likely	Families are the ones that ultimately responsible for their children's health. They should be encouraged to explore and research scientific data & seek the counsel of others before deciding the health choices for their family. My wife and I both researched the data on vaccinations for our children and we came to the conclusion to vaccinate our children. In saying, this I believe the medical data can be interpreted either way. But one ultimately must leave to the parent to decide. But where does law decide individual choice and that of the state? This is where we of course are at the mercy of the court. I as a legislator would try to decide what is in the best interest of families to the best of my abilities.
