STATE AUDITOR					
Chris Leyba	REPUBLICAN		Very Likely	As a student of biology I do believe there are vaccinations that have saved lives throughout the course of history. However I also acknowledge that the sheer amount of ingredients that have gone into these medical treatments over the years has skyrocketed and we are often rushing some of these to market without understanding the long-term effects of some of these. I believe that proven and substantiated medicine should always be encouraged but the proven and substantiated part is vital.	https://www.leybaaudits.com/
Pat (Patrice) McCarthy	DEMOCRATIC				https://www.patmccarthyauditor.com/

Matt Larkin	REPUBLICAN		Very Likely	I am absolutely opposed to SB-5395...My wife and I's signatures are on R-90. It must pass and when it does, it will give me great joy to defend it as Attorney General. Also, As a father of 4 little kids, we are wrestling with vaccinations and the scientific studies that are coming to light. They need to be studied further and public policy should be reflective of these studies. Also, I am very supportive of parents who choose to home school their kids. That choice is more important now than ever.	http://www.mattlarkinforag.com/
Bob Ferguson	DEMOCRATIC				https://www.electbobferguson.com/
UPERINTENDENT OF PUBLIC INSTRUCTION					
Maia Espinoza		Likely	Very Likely	Health Choice: I am very concerned a vaccine will be required in order for students to return to face to face instruction, we cannot accept this. SB 5395: Parental rights in education are paramount for students' long-term success. Student Funding: I would like to provide funding available for home schooling families with no strings attached. We can trust families to invest these funds as they see fit for their students without government interference.	https://www.maiaforum.com/
Chris Reykdal		Very Unlikely		Requested CSE bill	https://www.chrisreykdal.org/
INSURANCE COMMISSIONER					
Chirayu Avinash Patel	REPUBLICAN		Unlikely		http://www.onemanrepublicanthinktank.com/
