Visit COVID-19 Tracker and Map

Ask your local public health or look on www.WHO.int for data and projections and seek best practices and community resources as you communicate with community, your customers, and flatten the curve. What UAE employers are doing to tackle coronavirus threat after WHO directives.

- **Develop a response to Coronavirus and additional safety measures to keep others informed before reopening. Display signs and posters illustrating hand-washing – ask your local public health authority for these or look on www.WHO.int.** Your response should be available in electronic form and downloadable document form based on data, projections, diagnostic/testing and flattening the curve. Be sure to follow in conjunction with the mandate and CDC recommendation of keeping a minimum of 6 feet between you and others. Make sure public aware of any changes in your day-to-day operations or modified business hours. Make sure the signs are displayed near entrance for employees and customers in English, Spanish and any other languages. Also use symbols for hearing impaired. Subject line "Our response to COVID-19" "an important update from your company" and state any

- **Promote good respiratory hygiene in the workplace. Display posters promoting respiratory hygiene. Ensure that face masks¹ (fabric) and / or paper tissues are available at your workplace, for those who develop a runny nose or cough at work, along with closed bins for hygienically disposing them.**
 - **Make sure your workplaces are clean and hygienic and supplies are available.** Surfaces (e.g. desks and tables) and objects (e.g. telephones, keyboards) need to be wiped with disinfectant regularly because contamination on surfaces touched by employees and customers is one of the main ways that COVID-19 spreads. Sharing your delivery and takeout options will put customers at ease and help keep revenue coming.
 - **Put sanitizing hand rub dispensers in prominent places around the workplace.** Promote regular and thorough hand-washing by employees, contractors and customers. Make sure these dispensers are regularly refilled.
 - **Reassure your customers.** Let your customers know about all of the precautions you're taking to help reduce the virus spread. Include any additional cleaning measures or staffing adjustments, and reassure them that you're safe to do business with.
 - **Stay engaged with your social following.** More people will be staying at home, so your social media channels provide a captive audience opportunity. Use Social Posting and Scheduling to keep followers engaged.
 - **Combine this with other communication measures such as offering guidance from occupational health and safety officers, briefings at meetings and information on the intranet to promote hand-washing.**
 - **Make sure that staff, contractors and customers have access to places where they can wash their hands with soap and water because washing kills the virus on your hands and prevents the spread of COVID-19.** Brief employees, contractors and customers that if COVID-19 starts spreading in the community, anyone with even a mild cough or low-grade fever (37.3 C or more) needs to stay at home. They should also stay home (or work from home) if they have had to take simple medications, such as paracetamol/acetaminophen, ibuprofen or aspirin, which may mask symptoms of infection.
 - **Keep communicating and promoting the message that people need to stay at home even if they have just mild symptoms. Display posters with this message in your workplaces. Combine this with other communication channels commonly used in your organization or business.**
 - **Your occupational health services, local public health authority or other partners may have developed campaign materials to promote this message.**
 - **Make clear to employees whether that they will be able to count this time off as sick leave.**
 - **New guidelines issued for workplaces, business travel. Here's the latest**

Travel Advisories:

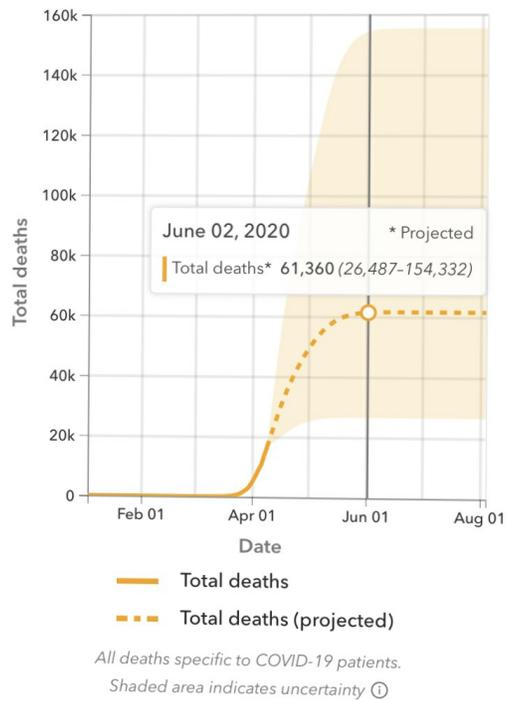

<https://travel.state.gov/content/travel/en/traveladvisories/traveladvisories.html>

- **Implement any mitigation plans including WHO.int, military assistance, FDA, mandates and executive orders. Go to CDC.gov for COVID plans for your state for 12/2020 to 18 months forward with data and projections and to flatten the curve** <https://covid19.healthdata.org/united-states-of-america> .
- Review, update, and implement emergency operations plans (EOP). This should be done in collaboration with *local health departments, external* and other relevant partners, community resources, DHS, military, U.S. Army and WHO.int.

United States of America

projected by August 4, 2020

United States of America

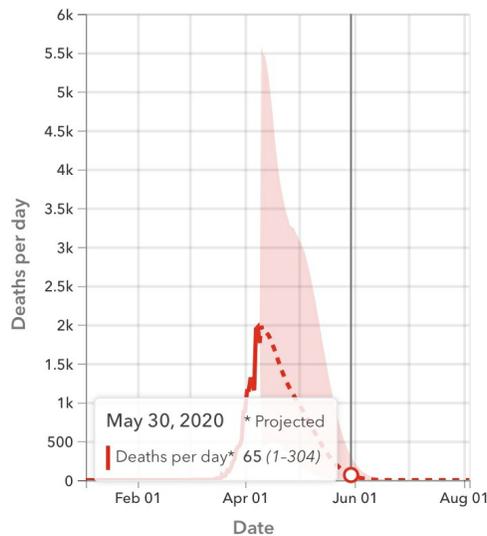

Total deaths

61,545 COVID-19 deaths
projected by August 4, 2020

1,983 COVID-19 deaths

projected on April 10, 2020

*All deaths specific to COVID-19 patients.*
