Company Overview

Orange EV manufactures pure-electric terminal trucks. No diesel. No emissions. Our 100% electric class-8 vehicles are proven to save money while being a safer and more reliable solution for container-handling operations. We're located 10 minutes from downtown Kansas City in Riverside, Missouri.

Position Summary

The Business Analyst will undertake a diverse and dynamic role to plan, design, develop, and launch efficient business, financial, and operations systems in support of core organizational functions and business processes. This includes gathering and analyzing data in support of business cases, proposed projects, and systems requirements. The Business Analyst is also responsible for generating and compiling reports based on the findings, complete with probable causes and possible solutions to systems issues.

Responsibilities may include:

- Meeting with decision makers, systems owners, and end users to define business, financial, and operations requirements and goals, and identifying and resolving issues.
- Reviewing and analyzing the effectiveness and efficiency of current business operations.
- Researching, analyzing, and summarizing current and future business markets.
- Collaborate in the planning and development. Prepare and deliver reports, recommendations, or alternatives that address existing and potential trouble areas across the organization.

Operational Management:

- Create accounting business plan proposals.
- Performing cost-benefit and return on investment analyses for proposed projects to aid management in making implementation decisions
- Identifying and identifying scope and establishing scope and parameters of systems requirements in order to define outcome criteria and measure-taking actions.

Position Requirements Knowledge & Experience:

- The Business Analyst will have a bachelor's degree or a minimum of two years of experience in a relevant role. In addition, the candidate will demonstrate the following through their education and/or experience:
- Demonstrated project management skills.
- Excellent analytical and creative problem-solving skills.
- Excellent written and oral communication skills.
- Excellent listening and interpersonal skills.
- Able to conduct research into systems issues and products as required.
- Highly self-motivated.
- Able to effectively prioritize and execute tasks in a high-pressure environment.
- Able to work effectively in a team-oriented, collaborative environment.
