

IT'S NOT JUST PART OF THE TURF.  
IT'S PART OF THE GAME.™

Envirofill is the natural choice for infill on football fields across the country. It's tough like the game itself, and players love it because it's cooler, more natural, and non-settling. Want an infill that can take some serious hits? Call 800-548-0402 or visit [usgreentech.com](http://usgreentech.com) for more information and samples.

“ With the Ragin’ Cajuns field being in the humid south, the heat can take a toll on the players and coaching staff. Choosing an infill that would reduce the heat effect and the humidity were paramount. During our first two weeks of practicing on the new field, we took daily heat and humidity tests on our Envirofill field and our natural grass field and the heat index on our Envirofill field actually tested lower than our natural field! Most importantly, our players absolutely love the speed and overall performance of the field. ”

-Scott Farmer, Associate Athletic Director, Louisiana Lafayette

**PRODUCT DATA ENVIROFILL® 12-20**

Physical properties	Measure	Test Method	Value
Dimensions	98.6% Retained 12-20 mesh sieves		
Materials	99.6% Silicon Dioxide, Pigment and Acrylic		
Hardness	Mohs Scale		6-8
Roundness			.6+
Density	lbs/cf	ASTM F-1815-06	110
Flammability		ASTM E648	Non-flammable
Dust			Negligible
Angle of Repose		ASTM C1444	±30 degrees
TCLP Metals Content	mg/kg	ASTM 6010	<Min Detectable Levels
Abrasiveness	Index	ASTM F 1015	26+/-2
Coefficient of Friction	Direct	ASTM F 1551	0.80 dynamic
Packaging	55lb bags or 3000lb Super Sacks
