Certificate of product safety
regarding the absence of substances banned
by international doping regulations
in products of EDER Health Nutrition

After checking the situation of the EDER Nealth Nutrition ("EHN") company in D-79115 Freiburg/Germany and the production sites of the products the undersigned confirms as follows:

1. Die products of this company are produces under severe regulations beeing in accordance with the current Eueopean and German food regulations. There ist no ingredient used which is not listed in the declared list of ingredients.
2. In the factories producing for EHN no substances are used (even not legally for other products) which are banned by international doping regulations. Therefore even the unwanted contamination with traces of such substances (like hormones oder prohormones) will be unpossible. Thereby there is maximum safety that the use of the EHN products cannot lead to the wrong suspicion of use of doping substances.
3. The most important products for competition sportsmen are checked by an internationally acredited laboratory for doping analysis and therefore these products are "WADA" certified by sepate documents.
4. To the knowledge of the undersigned who works as an adviser for the company since about 20 years there was never found any trace of doping substance in the products of this company.
