

SLIDING GATES

Sliding gates

**PATENTED NO WELD SLIDING GATE SYSTEM - INDUSTRY FIRST!
UP TO 6000MM WIDE SLIDING GATES**

- Fast and easy to assemble onsite using patented side frames & strategic heavy duty fixing screws
- Visually stunning gate - top rail matches with slat width & minimal wheel gap at bottom
- Cut to size system with an easy to use excel quote/order calculator
- 8 finishes - 5 powder coat colours, mill finish & Kwila & Western Red Cedar imaged aluminum

The patented non weld gate system is also designed for sliding gates upto 6000mm wide. They are assembled using the heavy duty top rail, side frames and strategic heavy duty fixing screws to avoid welding. They are available with all accessories such as track, rollers, guide rails & stops.

This visually stunning gate with the heavy duty top rail matching with the slat width and minimal wheel gap are ideal for automating your gate solution.

Overview

Introducing Australia's leading slat screening system developed with the trade and DIY in mind.

Slats simply push into the precision machined patented side frames and are held in position with no requirement for welding, riveting or screwing off every slat to provide a fast, simple and effective solution.

The privacy slat screening is a dynamic aluminium screening and shading solution that is ideal between pillars or posts.

The patented framing system means no requirement for welding, riveting or screwing off each slat with options of a 9mm or 20mm spacing. The screening system incorporates hidden fixings providing a visually pleasing solution with extremely low maintenance.

The system is available in a cut to size option or in long lengths which gives you the choice of assembling on site or have pre-assembled panels and gates.

Powder Coated

Slats are available in 5 genuine Australian Interpon powder coat colours including Black, surf mist, palladium silver, woodland grey and monument.

Available Powder Coated Screening Colours

Timber Imaged

The Alumawood product range provides the timber look finish without any of the maintenance.

Our new range of imaged aluminium provides a quality solution at a cost effective price without compromise on quality. The Interpon undercoat is used on all extrusion coupled with the genuine Italian Image film.

Available Colours

Slatted Sliding Gates

The patented non weld gate system is also designed for sliding gates upto 6000mm wide. They are assembled using the heavy duty top rail, side frames and strategic heavy duty fixing screws to avoid welding. They are available with all accessories such as track, rollers, guide rails & stops. This visually stunning gate with the heavy duty top rail matching with the slat width and minimal wheel gap are ideal for automating.

With the PATENTED NO WELD Xpressscreen Sliding Gate, achieve a visually stunning and sturdy gate with easy assembly

- 1 Gate side frame
- 2 Top rail
- 3 Bottom rail
- 4 Gate slat blade
- 5 65mm x 16.5mm slat
- 6 Centre support rail
- 7 Wheel assembly
- 8 Gate track

Ideal for
Automation

No welding required

SUPER STRONG - Strategic screws fix into screw flutes in gate top and bottom rail and middle 'gate blade'. The rest of the standard slats simply push into the patented side frames
