PHILOSOPHY

THE RANGER MICRO CAP GROWTH FUND seeks long term capital appreciation by investing in growth-oriented U.S. public equities of micro capitalization companies. The fund further seeks to capture and compound returns, manage risk and preserve capital by employing a disciplined, consistent approach to security selection, risk mitigation and ESG integration. The focus in the research process is on identifying micro capitalization U.S. equities characterized by accelerating revenue and earnings growth, high recurring revenues, strong balance sheets and free cash flow generation.

OUR APPROACH TO ESG is largely influenced by the following four themes: our ESG philosophy, materiality, original research and engaging management teams. Each of these themes are critical to understanding and creating a comprehensive view of each portfolio holding and prospective investments. We believe that companies who carefully evaluate ESG risks and opportunities in their businesses are better equipped to create shareholder value with less risk over time. Ranger is a signatory to the UN Principles for Responsible Investment (UN PRI) and Investor Stewardship Group (ISG).
