

October 2, 2014

Dear Friends,

Another school year approaches and we are excited to have our children start classes at [private school] once again. We know that our children are receiving an excellent education in a loving and caring environment. We are not just sending them off to school for a mandatory education, we know they are receiving essential life and faith skills. It is a school that we believe in and trust with our children. Normally, parents utilizing public schools don't have to pay for their children's education. By choosing a private education, we also choose to pay for tuition, since private education is not free. It is our hope that you will consider helping our family afford this expense.

Fortunately, this is not the typical request for money. Arizona realizes that private education is costly. To help families pay for tuition, Arizona has several tuition tax credit laws that enable Arizona taxpayers to make donations to certified organizations like YES Fund for Kids to be used as scholarships for students attending private schools. In return, the taxpayers are eligible to claim a dollar-for-dollar tax credit against their Arizona state income taxes!

You can financially aid a student's tuition, and love doing it, because you're being smart with your money and supporting Christian education at the same time!

Please read the enclosed brochure for more information about YES Fund for Kids and the donation process. On behalf of our entire family, thank you for considering this wonderful opportunity.

Sincerely,

The Doe Family
