Imaging Consultants, P.C.

Explore

THE POSSIBILITIES

If you feel that your radiology capabilities can and should be much more than what your competitors are offering, we invite you to have a conversation with us, as well as our clients.

You will find that we are a true partner within our network of affiliated hospitals, imaging centers and practices, who rely on our services—as well as our ongoing contribution to quality improvement—to deliver the very best care possible to their patients. You'll find that we consistently go beyond the call of duty, with a level of collaboration and cooperation uncommon among radiology providers. And you'll find that we have the vision to help you capitalize on the most important trends and advancements that make the field of radiology among the fastest growing and most dynamic areas of medicine.

A NEW PARADIGM *for medical imaging & interventional radiology*

Many see the radiology group or department as a cost center with a fixed menu of services. Other, more progressive healthcare organizations share a vision of radiology as a new frontier in medicine—one with a constantly evolving and growing list of services that contribute to superior care, better patient satisfaction and a stronger bottom line.

If your practice embraces the latter, it may be time to have a conversation with Advanced Medical Imaging Consultants (AMIC).

With more than 40 years of quality service and deep ties to communities within Northern Colorado, Wyoming and Western Nebraska, AMIC encompasses the vision and skills needed to turn your radiology offering into a critical area of growth and prosperity for your organization. Unlike national or offshore teleradiology providers, we offer you a higher level of accessibility, collaboration and personal, on-site service from a local team of professionals.

Whether you need expanded coverage for radiological interpretation or wish to add vital health screenings and minimally invasive procedures for a wide variety of health conditions, AMIC is a partner you can trust.

Traditional medical imaging that's **ANYTHING BUT TRADITIONAL**

Interpretative radiology services all appear similar on the surface. But when you look deeper, you'll find that there are surprising differences...in terms of the skills, the experience and the overall service philosophy of the doctors and the staff that support them.

AMIC is effectively raising the expectations of referring physicians and their patients. **We embody a more responsive, more accessible and more collaborative approach to healthcare** than you're likely to find with other radiology providers. We are among the most experienced physicians in the region, with the majority of our doctors having undergone additional, subspecialty training in one or more of the disciplines of diagnostic radiology.

COVERAGE

You can count on

Our subspecialized radiology team is available to you whenever you need it, Weekends and holidays are 100% covered by AMIC radiologists with final reads. We provide on-site coverage for procedures, ongoing collaboration with your center technologists and personnel, and complete teleradiology support.

Direct Access to a Radiologist
(970) 225-xray
1-888-325-xray

SIEMENS

MINIMALLY INVASIVE *therapies that attract patients, improve satisfaction*

Imaging-guided, interventional radiology procedures are now available for every organ system within the human body. Many of these are a viable alternative to conventional surgery, and others provide a complement to an existing treatment regimen. All deliver excellent outcomes while reducing the risk of complications and shortening recovery, which gives these procedures greater appeal to a wider base of patients.

Working with your team, we can implement an educational program with local and affiliated physicians to improve their understanding of how interventional radiology fits into the patient care equation.

Accessibility and **RESPONSIVENESS**

Consultation with a radiologist is always just a phone call away. You'll have access to one of our doctors 24x7x365, as well as to our robust PACS system where patient images and reports are readily available. We understand that fast report turnaround is vital to patient care, and you can count on us to get you the diagnostic information you need, when you need it, with actionable information and the ability to discuss any case with the reading radiologist.

SERVICES

DIAGNOSTIC RADIOLOGY

- MRI (*open and high field*)
- CT & CT angiography
- Ultrasound (*2D/3D/4D, Doppler*)
- PET & PET/CT
- Nuclear medicine
- Mammography (*2D & 3D tomosynthesis*)
- Breast MRI
- Breast ultrasound
- Bone densitometry
- X-ray/fluoroscopy

SCREENING

- Low-dose CT lung screening
- Coronary calcium score
- CT Colonography
- Carotid/abdominal/vascular ultrasound
- Prostate MRI

MINIMALLY INVASIVE (INTERVENTIONAL RADIOLOGY) TREATMENTS:

- Vascular disease
- Abdominal aortic aneurysm
- Cancer (*lung, liver, colon*)
- Uterine fibroids
- Pelvic congestion
- Pain management
- Spine pain/fractures

PROCEDURES

- Dialysis access management
- IVC filter placement & removal
- Nerve Block Interventions
- Prostate Artery Embolization
- Spinal Interventions
- Transjugular intrahepatic portosystemic shunt (*TIPS*)
- Biliary interventions: *percutaneous cholangiography, stone extraction, & stent placement*
- Urologic interventions: *percutaneous antegrade pyelography, nephrostomy tube placement, & ureteral stent placement*
- Gastrointestinal bleeding treatment: *intra-arterial embolotherapy & infusion techniques*
- Gastrointestinal feeding tubes: *gastrostomy & gastrojejunostomy*
- Percutaneous abscess drainage
- Percutaneous image-guided biopsy

It's time to
EXPECT MORE
from your radiology team.
