

# RAISE YOUR radiology expectations

## TELERADIOLOGY

**AMIC**

Advanced Medical  
Imaging Consultants, P.C.

## QUALITY & SERVICE

*do go hand in hand...*

The most common complaint about teleradiology providers is not their breadth of subspecialty expertise nor their quality of interpretations—it's their accessibility, responsiveness and willingness or ability to collaborate with the healthcare team.

At Advanced Medical Imaging Consultants (AMIC), we have built a reputation for both quality and service that is uncommon in radiology today. From seamlessly integrating with your IT systems and processes to continuously exceeding the expectations of your doctors and support staff, we are a true partner that extends the capabilities of your current team and affords you always-accessible expertise and added opportunity to expand your radiology services offering.

### ***Core Commitments***

- **High quality patient care**
- **Sub specialty training and expertise**
- **Integrity and ethics**
- **Expert knowledge exceeding community standards and expectations**
- **Accurate and timely service to healthcare providers and patients**

*Accountable only to*  
**YOU AND YOUR PATIENTS.**

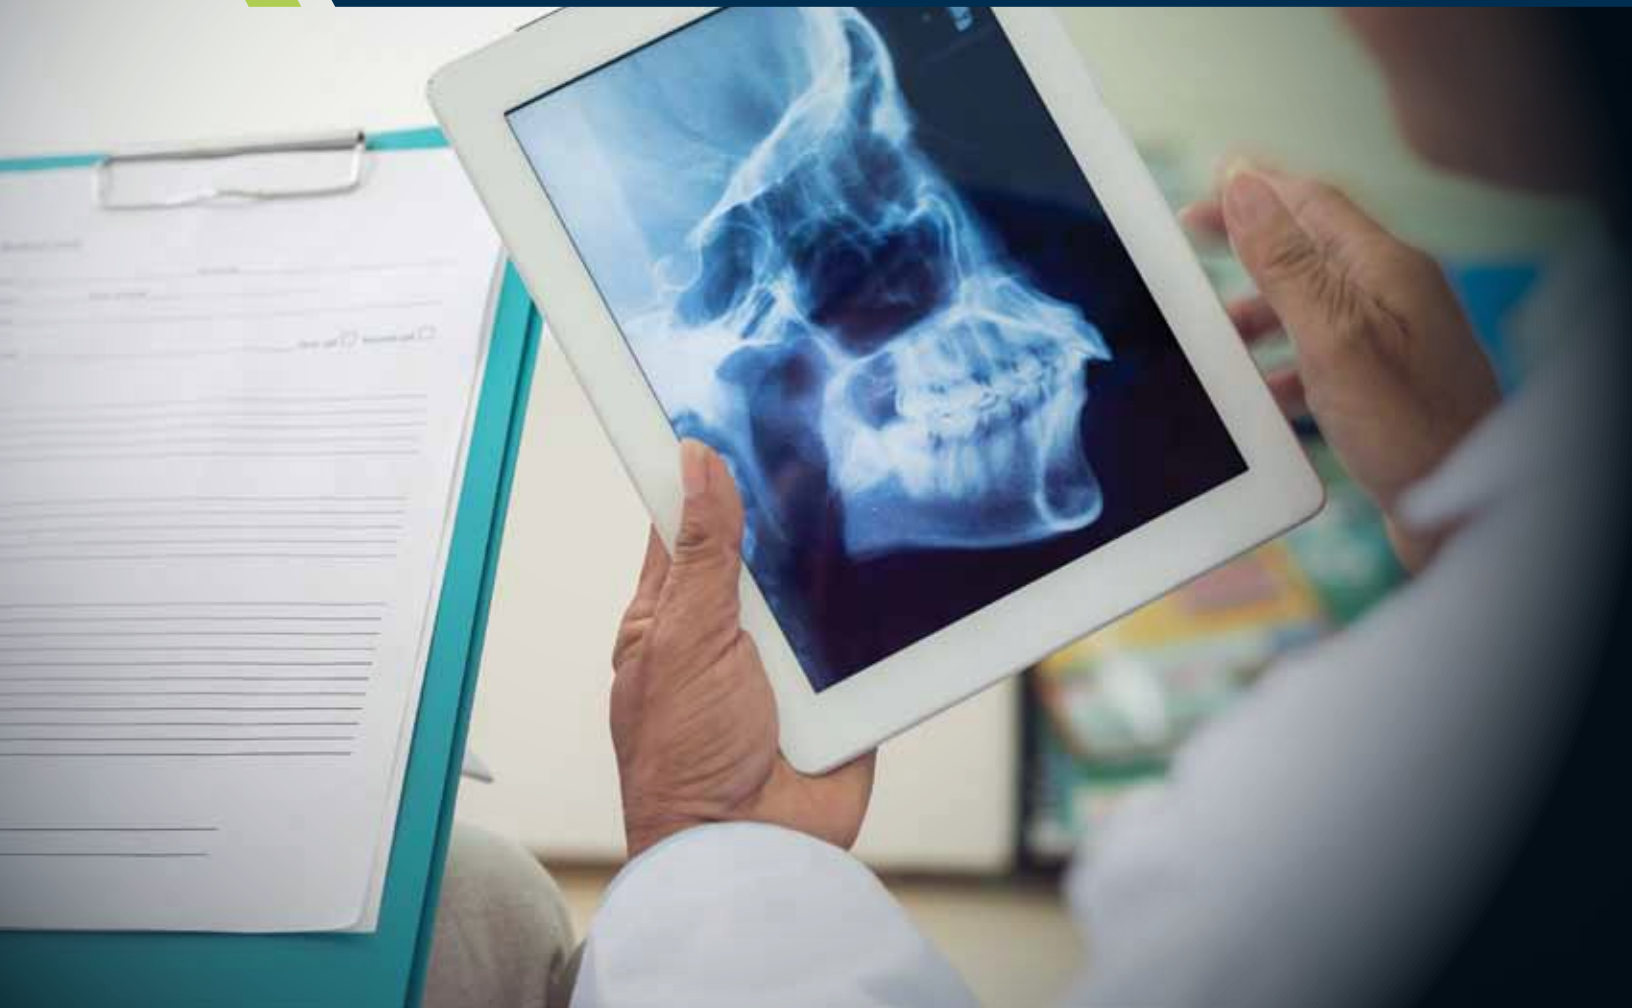

AMIC is a physician-owned practice and we ensure that our fellowship-trained radiologists remain focused exclusively on you and your patients, delivering quality care as a top priority.

Over 700 physicians in nearly every specialty of medicine rely on us for accurate diagnoses that are the foundation of excellent medical care, and often times the key to saving lives. Since 1976,

physicians have learned that they can count on us for timely service, expert interpretations and unrushed collaboration for the optimal care of their patients.

Our radiologists are accessible to you 24/7/365 in our U.S. based operations center. We offer report delivery in the manner best suited for your needs, whether via EHR integration, fax, or web portal.

*The mission of Advanced Medical Imaging Consultants is to be a premier Radiology group, noted for our commitment to the highest quality of patient care, service to health care providers, technical skills and diagnostic imaging capabilities.*

## THE EXPERTISE

*and training you require.*

When it comes to your patients' health, you want them to receive the same exceptional level of care that you provide from start to finish. At AMIC, we believe the best care starts with an experienced, credentialed staff who can provide you with skilled interpretations you can rely on.

We use best-in-class technology paired with patent pending, self-developed technology to deliver interpretations to referring physicians. This investment allows our radiologists and technologists to concentrate on patient care primarily, without getting bogged down in processes. It also allows for unprecedented access to our radiologists for protocol and clinical questions, and timely documentation of all exams containing clinical results.

AMIC radiologists are board-certified by the American Board of Radiology, which means they have passed stringent examinations after undergoing at least four years of residency training. In addition, each of our doctors have completed one to two additional years of subspecialty fellowship training in areas such as neuroradiology, nuclear medicine, musculoskeletal radiology, breast imaging, body imaging and interventional radiology.

*This specialization gives our radiologists enhanced knowledge of the latest diagnostic techniques and applications in their particular fields, which include:*

- **Body Imaging**
- **Abdominal Imaging**
- **Breast Imaging**
- **Musculoskeletal Imaging**
- **Cross Sectional Imaging**
- **Neuroradiology**
- **Vascular and Interventional Radiology**
- **Nuclear Medicine**
- **MRI**
- **Mammography**

## **ADVANCED SERVICES.**

*New revenue streams  
for your practice.*

The field of radiology is constantly expanding, and so are the capabilities and credentials of our extensive radiology team. We remain on the cutting edge of diagnostic and preventive medicine, well versed in the latest imaging equipment and techniques.

### **We offer:**

- Radiology interpretations for all modalities & specialties
- Expertise in stroke, lung cancer & other wellness screenings
- Ability to handle stroke and trauma protocols via teleradiology
- Expertise with emerging diagnostic imaging techniques, such as multi-parametric prostate MRI, Dotatate PET imaging & CT perfusion
- 24/7/365 subspecialty coverage
- Completely scalable PACS implementation & access
- Fast report turnaround
- Night, weekend & vacation coverage options
- Assistance with accreditations, clinical education, workflow design/management & equipment selection

## *Accreditations and Quality/ Safety Improvement*

We work with our partners to ensure compliance with all regulatory agencies, inspections and accreditations, which include:

- American College of Radiology (ACR)
- The Joint Commission
- National Accreditation Program for Breast Centers
- Nuclear Regulatory Commission
- United States Food & Drug Administration (FDA)
- Centers for Medicare and Medicaid Services
- Various state departments of public health and energy, as well as environmental protection

In addition, we are active members of our partners' organizations, and regularly participate in committees, quality improvement initiatives, safety initiatives and much more. Interpretations are subject to double-blind peer review, and a monthly summary of production and clinical analytics are provided for all partner facilities.

*Talk with us.*

**EXPERIENCE THE AMIC DIFFERENCE.**

*If your hospital, medical center or imaging practice is in the market for a teleradiology provider, we invite you to have a conversation with us. You'll find that AMIC has the experience and resources needed to provide exceptional diagnostic and preventive imaging services to your affiliated physicians and their patients.*

*It's time to expect more from your teleradiology team, and with AMIC, you can!*
